Preface

This volume, covering a ten year period of our dental literature, 1876 to 1885, is the fourth of the series to be published. The first volume published covered the literature for 1911-1915, the second 1916-1920, and the third 1839-1875.

This index is prepared on the plan of the Dewey Decimal Classification, although an entirely new classification for dentistry has been worked out. The Editor is under obligation to Mr. Melvil Dewey, and also to Miss May Seymour, the Editor of the Dewey Classification for many courtesies extended. The original draft of the classified Dental Index was made in 1898. In the intervening years many members of the profession have been consulted and their suggestions utilized in amplifying the original draft, as the indexing of various publications has progressed.

For this volume, the work of classifying the articles was performed by Miss Gladys Sherman, the typing of cards and preparation of copy for the printer by Mrs. Flora B. Mann and Mrs. W. P. Warner. They have also read proof and checked back every article in the classified index, with the original titles in the several journals, verifying page numbers, etc., and their conscientious efforts are much appreciated. All of this work has been carried on in the Editor's private library.

Dr. William Bebb, Librarian of Northwestern University Dental School, has supplied directly or secured from other libraries all of the journals to be indexed. He has also prepared the "List of Journals Indexed," with notations regarding their publication. The Bureau is also under obligation to Dr. L. P. Anthony, Editor of the Dental Cosmos, Dr. A. F. Isham, Buffalo, The Library of the New York Academy of Medicine, Dr. B. W. Weinberger, The Library of the Dental Department of the University of Pennsylvania, The Library of the Dental Department of the University of Michigan, The Library of the Washington University Dental School, The Library of Harvard Dental School, The Library of the Dental Department University of California, and the Library of the Dental Department of the University of Pittsburg, for journals loaned for indexing.

The profession is indebted to Dr. Abram Hoffman for his services as Secretary-Treasurer of the Index Bureau, including the very efficient handling of the finances, supervision of the printing and distribution of the Index. Reference is made in the article by Dr. Hoffman to the dental organizations and members of the profession who have made this publication possible by their liberal contributions and guarantees.

We wish to express our thanks to the J. W. Clement Company, Buffalo, New York, for their co-operation in the printing and publishing of this volume.

THE EDITOR.

Chicago, May 1st, 1925.

The Development of the Index and its Use

By ARTHUR D. BLACK.

In the three volumes previously published, covering in order of publication, the periods 1911-1915, 1916-1920, and 1839-1875, a statement was made as to the importance of this work in its relation to the development of the profession, and a report was made of the origin and growth of plans upon which the Index is being published. It is not considered necessary to reprint those statements in this volume, although a very brief review of the development and use of the Index may not be amiss.

While I was in dental college in 1897, I realized that a very considerable library of dental periodicals was almost useless because it was practically impossible to find the articles which had been written upon any subject. A study of the situation made it apparent that much valuable work, needed for the future development of the profession, would be lost, if a plan were not formulated by which the writings of the past could be made easily accessible. This seemed to me to be of great importance to the progress of the profession. The Dewey Decimal Classification was selected as best adapted to our purpose, although Dewey's Classification for dentistry was unsatisfactory, and Dr. Frederick B. Noyes and the writer prepared the framework upon which the present classification for dentistry has been developed. This work was begun in 1898. In order to test out and adjust the plan to our literature, the articles in the Dental News Letter, 1847-1859, and the Dental Cosmos, 1859-1902, were indexed. This required 25,741 cards for subject and author catalogues and about 1,200 hours were devoted to this task during the years 1898-1903.

In the development of the plan of classification, it was realized that the classification must be made to fit the literature, rather than to attempt to adjust the literature to what might be considered an ideal classification. The wide range of journals indexed, covering the entire period of dental journal literature, and the satisfactory use of this index over a period of nearly twenty years by many individuals in the preparation of essays, by the editorial department of the Dental Cosmos, and in the school library, have proven its worth. We did not hesitate, therefore, to use this plan for the larger task of indexing all of the periodical literature published in the English language and we are confident that it will be generally accepted as thoroughly practical.

The attention of our dental teachers was called to this plan of indexing at the annual meeting of the Institute of Dental Pedagogics held in St. Louis, December 30, 1908, to January 2, 1909. * As a result, a committee was appointed to organize the Dental Index Bureau and to devise ways and means for carrying out the work. During the twelve years intervening, until the publication of the first five-year index, many obstacles were encountered and finally overcome. The difficulties of financing this effort have been related by the Secretary-Treasurer, Dr. Abram Hoffman.

*Proceedings Sixteenth Annual Meeting of the Institute of Dental Pedagogics, 1908-9, P 144.

It is quite certain that a search of the literature on almost any subject on which one would write today, will reveal much of value, that might cause considerable rearrangement of the views of the reader, might lead him into new angles of thought, which would change the character of his writing and make the article of greater worth, because it would more likely fit into its proper place as a link in the development of the profession along a particular line.

The publication of the Index should also remind the writer of today and tomorrow, that his article will soon be listed in an index, along side all others on the same subject, and if he would have his survive, he must put into it the study and effort which will command the attention and respect of those who read in future years. A hurriedly written paper is usually a poor contribution, which will not stand the test of time.

The published article that is accompanied by ample bibliographical references which are a definite evidence of the author's familiarity with previous writings on the same subject, is more likely to command an audience of the best readers than an article which gives credit to the views of no one else, and therefore presumably presents the ideas of one man only.

The index offers the opportunity to study the literature of the past, to give credit to those who laid the foundation upon which dentistry stands today, and to improve our service for the future. If used as it should be, every article to be hereafter published should be a more valuable article than it would be without the Index.

Especial attention is called to the article in this volume by Dr. William H. Truman of Philadelphia on the "History of Dental Periodicals of the British Empire from 1843-1924." This is the continuation of a previous article by the same author on the "History of Dental Periodical Literature in the English Language from 1839-1875," in which the periodical literature of the United States and Canada was reviewed. This article appeared in the Index volume for 1839-1875.

Attention is also called to the article in the 1916-1920 volume on Dental Bibliography by Dr. Andrès G. Weber, of Havana, Cuba. This is the most complete list of dental bibliographies ever prepared, and should serve as the basis for all future work.

The first effort to publish an index of the periodical dental literature was by the late Jonathan Taft in 1886. Dr. Taft's book of 207 pages contains about 11,000 references to selected articles in our journals published in English from the first issue of the American Journal of Dental Science in 1839. In 1889, David published an index of the French periodical literature and in 1891 Sternfeld issued an index of 211 pages, which included both books and periodical literature, mostly German. In 1903, Port, of Heidelberg, undertook the publication of an annual index of German periodical dental literature, which was continued for five years. In 1911 Paul de Terra, of Zollikon-Zurich, edited the Index Stomatologicus, an international classified index, which was maintained for three years. Dr. Theo. B. von Beust assisted with this publication.

In medicine, in law, and in many of the sciences, quite a number of persons devote their entire time to abstracting articles for those who are writing for publication. The busy practitioner may not have sufficient time to review all that has

been written on a particular subject and therefore takes advantage of the opportunity to employ an expert abstractor who provides the material from which he may draw desired quotations or references. This plan should be developed in dentistry. In our larger city or dental college libraries, encouragement should be given to library workers who will supply material upon any subject. This plan makes it possible for a limited number of good libraries to supply a large number of practitioners, even those who live in the most remote communities.

An important use of this index should be in our dental colleges. Courses should be established—have already been definitely organized in several schools—for the express purpose of acquainting students with the periodical literature of the profession and training them in its use. Of many plans that might be followed, we will suggest one with which we have had experience. A series of topics (one a week for a semester, or a school year) may be chosen on a single subject, such as operative dentistry, orthodontia or dental pathology. The one in charge of the course may, with the aid of the index, select several articles on each topic; the entire list for a topic making a total of fifty or more pages. These lists may then be assigned several weeks in advance with the understanding that the student will prepare an essay which will be read before the class, requiring fifteen or twenty minutes. Other members of the class may be assigned the same list of articles, or only the topic, with the request that they come prepared to discuss the essay. If the topic only is given them, they must necessarily go to the index and select articles for review in order to prepare themselves. Following the presentation of the essay and discussion, the instructor in charge may complete the hour with his own criticism and views. Similar courses may be arranged for several subjects, giving an additional hour per week for each.

This plan is equally applicable to the dental practitioners study club. Such courses will serve not only to acquaint students with our literature and with methods of study and theme writing, but also help to establish a habit of looking to our journals for information, and of using discretion and judgment in the acceptance of statements made. Eventually an acquaintance with the writings of our best men should be definitely established.

Our colleges do not attempt to graduate men fully prepared to practice. The college aims to give the fundamentals—the groundwork; the graduate must build his own professional structure. If he keeps himself up to date he must read the dental journals and be able to draw proper deductions. It should therefore be the duty of the college to train a student to study. He should then be able to keep abreast of the times after graduation. This index places the opportunity at the door of every dental college and of every practitioner.

XUM

List of Dental Journals Indexed for Years 1876-1885. Inclusive.

Prepared by WILLIAM BEBB.

The publication of this index unquestionably will stimulate increased interest in dental literature. This will be followed by a desire to possess a dental library. While some of the publications listed are rare (in some instances but one complete file being in existence) many complete sets of the journals which have had a wider circulation are still to be collected. Notations are entered for those journals which were not published regularly throughout the ten-year period.

As an aid to those interested in making a collection the following list is published.

ADVERTISER, DENTAL. 1876, current. Quarterly.

ALABAMA STATE DENTAL ASSOCIATION TRANSACTIONS. 1883. Annual.

AMERICAN DENTAL ASSOCIATION TRANSACTIONS. 1876, current. Annual.

AMERICAN DENTAL CONVENTION TRANSACTIONS. One volume issued, 1877.

AMERICAN DENTIST. Elgin, Ill. Three numbers issued, 1883. Quarterly.

AMERICAN JOURNAL DENTAL SCIENCE. Third series. 1876, current. Monthly.

AMERICAN MEDICAL ASSOCIATION JOURNAL, Section on Dental and Oral Surgery. Chicago. Weekly. (Only papers read before Section on Dental and Oral Surgery are indexed.) Vol. I, 1883. Vols. IV and V, 1885.

AMERICAN MEDICAL ASSOCIATION TRANSACTIONS, Section on Dental and Oral Surgery. Chicago. Annual. (Only papers read before Section on Dental and Oral Surgery are indexed.) Vol. XXXIII, 1882.

ARCHIVES OF DENTISTRY. Vol. I, Jan. 1884, current. Monthly.

BALTIMORE DENTAL RECORD. One number issued, April, 1882.

BRIEF, DENTAL. St. Louis. Two numbers, Vol. I, No. I, 1881, and Vol. I, No. I, 1882. Semi-annual.

BRITISH DENTAL ASSOCIATION JOURNAL. Vol. I, 1880, current. Monthly.

BRITISH JOURNAL DENTAL SCIENCE. 1876, current. Semi-monthly.

CALIFORNIA STATE DENTAL ASSOCIATION TRANSACTIONS. 1876, current. Annual.

CALIFORNIA STATE ODONTOLOGICAL SOCIETY TRANSACTIONS. 1884, current. Annual.

CANADA JOURNAL DENTAL SCIENCE. Vol. III, 1876, to close. Monthly. Vol. IV, 1877-1879, 4 numbers in one book.

CAULK'S DENTAL ANNUAL, First and Second edition. 1883, current.

CINCINNATI MEDICAL AND DENTAL JOURNAL, THE. Vol. I, 1885. Monthly.

CONNECTICUT VALLEY DENTAL SOCIETY TRANSACTIONS. 1876, 1877, 1878, 1879. In one volume.

COSMOS, DENTAL. 1876, current. Monthly.

ECLECTIC, DENTAL. Vol. I, 1885, Sept. No. 1. Nov. No. 2. Bi-Monthly.

DENTAL OFFICE AND LABORATORY. Second series, quarterly, April, 1877, current.

DENTAL AND ORAL SCIENCE MAGAZINE. One volume published in place of the New York Odontological Society Transactions, 1878. Quarterly.

DENTAL STUDENT, Warsaw, Ind. First issue, March 10, 1884. Quarterly.

DENTIST'S BEACON LIGHT. One number issued, Vol. I, No. I, Oct., 1882.

FACTS, DENTAL. Chattanooga, Tenn. Vol. I, 1885. Quarterly.

HEADLIGHT, DENTAL. Vol. I, 1880, current. Quarterly.

HERALD OF DENTISTRY, N. Y. 1881 to 1884. 13 numbers issued irregularly.

ILLINOIS STATE DENTAL SOCIETY TRANSACTIONS. 1876, current. Annual.

INDEPENDENT PRACTITIONER, Vol. II, 1881, current. Monthly. Vol. I, 1880, issued under title The Practitioner.

INDIANA STATE DENTAL SOCIETY TRANSACTIONS. 1882, 1883. Annual.

IOWA STATE DENTAL SOCIETY TRANSACTIONS, 1878, 1880, 1885.

ITEMS OF INTEREST, DENTAL. Irregularly published from volume I, July, 1879 to volume III, 1881. Thereafter issued regularly as a monthly, current. Corrections: Vol. IV, 1882, Nos. 5, 6, 7,11, incorrectly marked Vol. V. Volume VII, 1885, April paging ends with 192 and May begins with 226.

JAIRUS, DENTAL. 1879-1884. Vol. IV, only Nos. 1, 2, 3, and Vol. V. Nos. 1, 2. Monthly.

JOHNSTON'S DENTAL MISCELLANY. VOL. III, 1875 to close Vol. VIII, Dec. 1881. Monthly.

KANSAS STATE DEN. ASSOCIATION TRANSACTIONS. 1876.

KENTUCKY STATE DEN. SOCIETY TRANSACTIONS. One volume. 1878.

LUMINARY, DENTAL. Georgia. May, 1879, current. Quarterly.

MARYLAND STATE DENTAL ASSOCIATION TRANSACTIONS. 1876. Annual.

MICHIGAN STATE DENTAL SOCIETY TRANSACTIONS. 1877, 1878, 1879, 1880, 1881, 1882, 1884, 1885. Annual.

MISSOURI DENTAL JOURNAL, THE. Vol. VI, 1876 to close, Vol. XV, Dec. 1883. Corrections: Vol. XI, No. 1, marked on the cover, Vol. IX, and inside Vol. X. Monthly.

MISSOURI STATE DENTAL ASSOCIATION TRANSACTIONS, 1865-1882. In one volume.

MONTHLY REVIEW OF DENTAL SURGERY. Vol. V, 1876 to close Vol. VIII, 1879. Monthly.

NATIONAL ASSOCIATION OF DENTAL EXAMINERS TRANSACTIONS. 1883.

NATIONAL DENTAL ASSOCIATION TRANSACTIONS. In place of Southern Dental Association Transactions. One volume, 1879.

NEW ENGLAND JOURNAL OF DENTISTRY. Jan. 1882 to 1884. Three volumes issued, ending with volume III, No. 10, when the publication was absorbed by the Archives of Dentistry, Nos. 11, 12, of volume III, with the same cover as the Archives, but paged to follow No. 10 of the New England Journal. Monthly.

NEW JERSEY STATE DENTAL SOCIETY TRANSACTIONS. 1876, current. Annual.

NEW YORK ODONTOLOGICAL SOCIETY TRANSACTIONS. 1876, current. Annual.

NEW YORK STATE DENTAL SOCIETY TRANSACTIONS. 1876, current. Annual.

NEWS, DENTAL. Knightstown, Ind. Vol. I, May, 1878 to Vol. VII, April, 1885. Monthly.

ODONTOGRAPHIC JOURNAL. April, 1880, current. Quarterly.

ODONTOLOGICAL SOCIETY OF GREAT BRITAIN TRANSACTIONS. 1876, current. Annual.

ODONTOLOGICAL SOCIETY OF PENNSYLVANIA TRANSACTIONS. 1879, current. Annual.

OHIO STATE DENTAL SOCIETY TRANSACTIONS. 1876-1881, 1882, 1883. Annual.

OHIO STATE JOURNAL OF DENTAL SCIENCE. Feb. 15, 1881, current. Vol. I, six numbers to close with December. Monthly.

PENNSYLVANIA JOURNAL OF DENTAL SCIENCE. Vol. II, 1875. Vol. III, 1876. Monthly. Last number December, 1876.

PENNSYLVANIA STATE DENTAL SOCIETY TRANSACTIONS. 1879-1885. Annual.

PRACTICAL DENTIST, Elgin, Illinois. Three numbers issued from Sept. 1883 to Jan. 1884.

PRACTITIONER, DENTAL. Vol. I, 1880. Changed to Independent Practitioner Vol. II, current. Monthly.

PRACTITIONER, DENTAL. Philadelphia. Vol. I, 1883, current. Monthly.

RECORD, DENTAL. London. Vol. I, 1881, current. Monthly.

REGISTER, DENTAL. Vol. XXX, 1876, current. Monthly.

REVIEW, DENTAL. Charlotte, Michigan. Two numbers issued, March 15, 1884, and April 15, 1884.

SOUTH CAROLINA STATE DENTAL ASSOCIATION TRANSACTIONS. 1869-1884 in one volume.

SOUTHERN DENTAL JOURNAL. Vol. I, 1882, current. Monthly.

TEXAS DENTAL JOURNAL. Vol. I, 1883, current. Quarterly.

A Review of the Activities of the Dental Index Bureau

By Abram Hoffman

In each of the previous volumes of the Index there has been a statement relative to the activities of the Bureau with special reference to the problems encountered in financing the work. It seems somewhat superfluous to reiterate these matters at this time but the Board believes it is quite proper to publish again the lists of individuals, schools and other organizations that have, through their generous support, made the project possible.

The publication of each successive volume seems to lend an additional confidence and our financial burdens have become correspondingly lessened so that now at the time of presenting the fourth of the term volumes we are nearly free from care. We wish to express special appreciation for the continued support of the dental schools and the Research Commission of the American Dental Association.

The Trustees of the American Dental Association, at a meeting held at Chicago in March of this year, gave our efforts the greatest material endorsement we have had when they granted $7500.00 for our operations during the present year with the understanding that a further grant would be made each year until the publication is up to date. This action is subject to the approval of the House of Delegates at the Louisville meeting of the Association in September, 1925, and we earnestly hope for their continued support.

Assistance of this nature will enable us to carry on our operations with considerable dispatch and the profession will be assured of the completed Index to 1926 within a comparatively short time. Practically all of the indexing has been done and much of the copy is ready for the printer.

We wish to take this opportunity to thank all who have assisted us in our endeavor.

Original Subscribers

The following is a list of the individuals, colleges and societies responding to the early requests for $25.00 per year for three years and the amounts paid upon these subscriptions. There were quite a few subscriptions upon which payments were never made; they are not included here. (1911-1915 Volume.)

Arthur D. Black, Chicago	$25.00
H. T. Smith, Cincinnati	25.00
F. W. Gethro, Chicago	25.00
T. L. Gilmer, Chicago	25.00
R. T. Moffatt, Boston	25.00
W. L. Fickes, Pittsburgh	25.00
S. W. Bowles, Washington	25.00
W. H. G. Logan, Chicago	25.00
Andres G. Weber, Havana, Cuba	25.00
Richard Summa, St. Louis	25.00
Victor H. Jackson, New York City	25.00
Wm. B. Dunning, New York City	25.00
H. E. Friesell, Pittsburgh	25.00
Clarence J. Grieves, Baltimore	25.00
Henry W. Gillette	25.00
Thos. P. Hinman, Atlanta	25.00
B. E. Lischer, St. Louis	25.00
Thos. F. Fletcher, San Francisco	12.50
University of Illinois, College of Dentistry	50.00
University of Denver, School of Dentistry	25.00
Australian College of Dentistry	25.00
Chicago College of Dental Surgery	25.00
University of California, College of Dentistry	25.00
Harvard University, Dental School	25.00
Indiana Dental College	25.00
Northwestern University, Dental School	25.00
University of Pittsburgh, School of Dentistry	25.00
University of Buffalo, College of Dentistry	25.00
St. Louis University, School of Dentistry	25.00
Ohio College of Dental Surgery	25.00
Royal College of Dental Surgeons	25.00
Starling-Ohio Medical College, Dental Department	12.50
Pennsylvania State Dental Society	50.00
Cleveland Dental Society	42.87
Academy of Stomatology, Philadelphia	25.00
Milwaukee Odontological Society	25.00
Odontological Society of Western Pennsylvania	25.00
Odontological Society of Cincinnati	25.00
New York State Dental Society	25.00
New York State Dental Society, Second District	25.00
New York State Dental Society, Fourth District	25.00
New York State Dental Society, Fifth District	25.00
Chicago Dental Society	25.00
Illinois State Dental Society	25.00
Central Dental Association of New Jersey	25.00
Washington State Dental Society	25.00
Hartford Dental Society	25.00
Denver Dental Association	25.00
Odontologist Library, New York City	12.50

Subscriptions from Dental Colleges, Societies and Journals

This list includes donations to the Index fund by dental colleges, societies and journals. The amounts paid by the various dental schools, in response to the call in 1918, are based upon their student enrollment. The sums here mentioned are in addition to amounts published in the other lists. (1911-1915 Volume.)

Northwestern University, Dental School	$205.00
University of Minnesota, College of Dentistry	95.00
Vanderbilt University, School of Dentistry	35.00
University of Louisville, College of Dentistry	60.00
Royal College of Dental Surgeons	75.00
Chicago College of Dental Surgery	200.00
University of Michigan, College of Dental Surgery	90.00
Ohio College of Dental Surgery	30.00
University of California, College of Dentistry	50.00
University of Iowa, College of Dentistry	75.00
Indiana Dental College	60.00
University of Buffalo, College of Dentistry	80.00
The Thomas W. Evans Museum and Dental Institute, School of Dentistry, University of Pennsylvania	185.00
Temple University, Philadelphia Dental College	60.00
Cincinnati College of Dental Surgery	20.00
St. Louis University, School of Dentistry	65.00
Ohio State University, College of Dentistry	40.00
Washington University, Dental Department	35.00
University of Pittsburgh, School of Dentistry	100.00
New York College of Dentistry	66.66
University of Illinois, College of Dentistry	55.00
Tulane University, College of Dentistry	20.00
College of Dental and Oral Surgery, New York	185.00
University of Southern California, College of Dentistry	70.00
University of Denver, School of Dentistry	50.00
Tufts College, Dental School	150.00
Georgetown University, Dental Department	30.00
University of Montreal, Faculty of Dentistry	40.00
Creighton University, College of Dentistry	40.00
Medical College of Virginia, Dental Department	30.00
University of Tennessee, College of Dentistry	15.00
McGill University, Faculty of Dentistry	15.00
Dalhousie University, Faculty of Dentistry	20.00
Harvard University, Dental School	65.00
George Washington University, Department of Dentistry	40.00
North Pacific College of Dentistry	85.00
Marquette University, Dental School	127.00
Atlanta-Southern Dental College	75.00
Loyola University, School of Dentistry	20.00
University of Nebraska, College of Dentistry	100.00
Baylor University, College of Dentistry	75.00
New York State Dental Society	200.00
Illinois State Dental Society	100.00
The Dental Cosmos	100.00

Baylor University, College of Dentistry.
Columbia University, School of Dentistry.
Georgetown University, Dental Department.

Contributions

The following have contributed to the Index funds since the list as published in the 1911-15 volume was compiled:

California State Dental Society.
Chicago Dental Society.
Cuban Odontological Society.
Illinois State Dental Society.
National Dental Association.
New York State Dental Society.
First District Dental Society (New York).
Ninth District Dental Society (New York).
R. J. Rinehart, Kansas City, Mo.

The following societies have contributed to the Index funds since the list as published in the 1916-1920 volume was compiled:

American Dental Association.
American Dental Association, Research Commission.
New York State Dental Society.
First District Dental Society (New York).
Minnesota State Dental Association.
Michigan State Dental Society.
British Dental Association.
Illinois State Dental Society.
Nebraska State Dental Society.
Pennsylvania State Dental Society.
American Institute of Dental Teachers.
Denver Dental Association.
Kentucky State Dental Association.
District of Columbia Dental Society.
Southern California Dental Association.
Connecticut State Dental Association.

The following societies have contributed to the Index funds since the list as published in the 1839-1875 volume was compiled:

American Dental Association.
American Dental Association, Research Commission.
New York State Dental Society.
Colorado State Dental Society.

Colleges—Contributions

The following schools have contributed $50.00 each toward financing the 1876-1885 volume of the Index:

Northwestern University, Dental School, Chicago.
Vanderbilt University, School of Dentistry, Nashville.
University of Louisville, College of Dentistry, Louisville.
Royal College of Dental Surgeons, Toronto.
Chicago College of Dental Surgery, Chicago.
University of Michigan, Col. of Dental Surgery, Ann Arbor.
Ohio College of Dental Surgery, Cincinnati.

XUM

HISTORY

of the

Dental Periodical Literature of the British Empire, 1843-1924.

By WILLIAM H. TRUEMAN

Introduction.

That Mr. George Waite's Pamphlet of 1841, expressing his regrets at the then deplorable condition of the dental profession in England, and offering suggestions for its betterment, led to the first breaking of the icy apathy which surrounded it, there seems to be no doubt. He was not alone. Gentlemen prominent in dental ranks appreciating the untoward conditions seconded his efforts. They appealed to the Royal College of Surgeons for aid, and were repulsed. It was at this juncture that dental periodical literature made its advent in England. The first number of the first volume of "The British Quarterly Journal of Dental Surgery," edited by Mr. James Robinson, and published by John Churchill, London, appeared March 30, 1843, 64 pages. A second number followed June 30, the same year. With this the journal ended. Dr. Harris, in the American Journal of Dental Science, Vol. III, June 1843, page 282, editorially, gives the new journal a warm welcome.

This was followed by "The Forceps, A Journal of Dental Surgery, and the Collateral Arts and Sciences," owned and edited by James Robinson. It began its short and stormy career January 13, 1844. It was bi-weekly, in small newspaper form. It came into being when the issues raised by Mr. Waite's pamphlet appealing to Parliament, the medical profession and the public, for legislation to enforce an educational standard for dental practitioners, was under discussion. Radical differences of opinion regarding the standard, and especially how it should be reached and recognized, quickly developed.

Mr. Robinson took an active part in this controversy. He was prominent as a practitioner, a man of means and a liberal contributor to the various projects for betterment that developed during the dental reform movement. He lacked the diplomatic reserve essential to successful leadership, in a heated controversy. It is to this that these two journals proved an unfortunate beginning.

Of "The Forceps," Mr. Alfred Hill, in his history of the Reform Movement in the Dental Profession in Great Britain, has this to say:—"It was a mistake. The spirit manifested in its pages was satirical, and in many instances offensively personal. There appeared from time to time short biographical sketches of some of the leading dentists, which were more caricatures than delineations of character, and were altogether to be condemned. The Forceps could never achieve any good, was calculated to irritate many, and produce much hostile feeling against the writer. Happily, the journal had a short existence; yet lived long enough to bring about a spirit of antagonism to Mr. Robinson from many quarters, from which he suffered for many years afterwards." (1)

He later confided to Mr. Hill, "I heartily wish I had never had anything to do with it; and I should like to know that not a single copy of it was now in existence."

The first issue is dated January 13, 1844. The year ended with No. 36, December 28, 1844. It was discontinued early in 1845; a note in Stockton's Dental Intelligencer, Vol. II, No. 1, November 1845, page 17, acknowledges the receipt of back numbers to No. 31; a similar note in the next number, December, 1845, announces, with regret, the discontinuance of the publication.

(1) The History of the Reform Movement in the Dental Profession in Great Britain. By Alfred Hill. Trubner & Co. London, 1877. Page 300-301.

It was unfortunate that this first effort proved so discouraging. Beyond, (*perhaps*) disclosing conditions to be met and overcome, it held back the organization of dental practitioners in England a full decade. There was, however, a gradual awakening to the importance of action that led to the organization of the Odontological Society of London, November 10, 1856, shortly after the advent of the first successful dental journal, The British Journal of Dental Science.

The British Journal of Dental Science

July 1, 1856, will ever be memorable in the annals of dentistry in Great Britain, as on that day was issued a monthly journal to represent the profession; to cater to its interests; to sturdily and steadily contend for organization and advancement on educational lines. It was launched as the enterprise and property of Mr. Walter Blundell, and bore the title of "The British Journal of Dental Science."

Each number consisted of about 32, 6 by 12 inch, double column pages. In his initial address he says:—"The honor and responsibility of our undertaking demands a few introductory observations concerning our principles and intentions. Almost every class—nay, shade of class—Science, Art, and Profession, possesses its representative journal, through which it has risen to a recognized status, while the Dental Practitioners of this country have been for many years without such a desideratum —a fact that is not creditable to them as a body of intelligent and really professionally educated men."

"The columns of the "British Journal of Dental Science" are open for free discussion, unfettered by cliqueism, and at the disposal of any and every member of the profession requiring a medium for the extension of accumulated knowledge, let it be ever so fragmentary or varied in degree of excellence."

"Finally, we beg for mutual aid in this common interest—which we fervently hope will unite us in the most friendly intercourse, and prove a lasting source of gratification and advantage."

The first number is filled with a variety of practical articles suited to the various needs of a dental practitioner. The editorials are unusually well written, enforcing persistently the importance of providing a School for dental instruction, and organizing the profession for their support.

At the close of the year Mr. Blundell sold the journal to some of the profession who were favorably disposed towards the recently organized Odontological Society. At this time the profession was divided, one party favored a separate and distinct dental school, such as were organized in the United States. The other party was seeking recognition from the College of Surgeons. The Odontological Society was earnestly working to secure this recognition. While there seemed to be a leaning towards the projected College of Dentists on the part of the journal, its editorials were more urgent for unity in the profession. It certainly gave a fair hearing to both sides of the question.

An editorial in the number for June 1857, has this interesting item:—"Mr. Tomes has placed at our disposal a manuscript copy of a Course of Lectures delivered by Mr. Rae in 1782. The manuscript does not appear to be in the hand writing of Mr. Rae, but in that of a pupil, who took elaborate notes of each lecture, and afterwards gave them a careful revision. The date is preserved but it is not stated where the lectures were delivered. These lectures are printed in subsequent numbers, and make interesting reading. (1)

(1) Concerning Mr. Rae, the following is from Mr. Downing's introduction to a new edition of John Fuller's Essay on the Teeth, London, 1815:—"The first person to give a distinct course of lectures on the teeth was the late Mr. Rae, surgeon dentist to the King. This gentleman met with premature death by a fall from his horse. In 1799, my much esteemed brother-in-law, Mr. Joseph Fox, commenced a course of lectures on the teeth, which he has since continued to deliver every season at Guy's Hospital."

Upon this Subject are examined.

DUBLYN, Printed and are to be ſold in *London*, by *William Whitwood* in *Duck Lane*, 1687.

The above is a copy of the title page of a second edition of the first known work on Dentistry in the English Language, a work practically unknown until early in the spring of 1924, when Dr. B. W. Weinberger, of New York, looking over a catalogue of old works on botany, etc., noticed the title, and fortunately secured the copy, a reprint of which he published in "The Journal of the American Dental Association", June, 1924.

Although various Dental Histories and Dental Bibliographies had noted its title, date of its publication and the name of its author, its contents were unknown until this reprint appeared

238 years after the publication of the first edition in Dublin, 1686, with a somewhat different title. Of this first edition, only two copies are known. Of the later edition, 1687, eight copies have been located.

John Bale, Sons and Danielsson, publishers of London, have issued a reprint of a copy of this work in the British Museum of London, to which Mrs. Lilian Lindsay, Hon. Librarian of the British Dental Association, has added an introduction, giving a history of the work as far as known, a resume of its contents, and a review of the political conditions under which it was written and published. This writer says:

"This small quarto which has attracted the attention of dental librarians in America and England during the last year has been known only by a title, sometimes without an author's name attached, in dental bibliographies from the beginning of the nineteenth century, and has been mentioned only by one or two writers on dental literature. The reason for its preservation does not lie in its value as a dental work, nor in the fact that it seems to be the first book on the subject written in the English language, but rather because it is one of the rare examples of printing in Dublin in the Seventeenth century. That century was probably one of the most troublous and disastrous that even the distressed people of Ireland have experienced. Rebellion, suppression, war and persecution were their lot without intermission; persecution of both Protestant and Catholic, and civil as well as religious. Writers of all kinds were afraid to have their works published, and those who dared do so could hardly get printers brave enough to carry out the work; therefore, many Irish works were published abroad, or, when published at home, bore in some cases the name of a foreign town—such as "printed in Roan" (Rouen). Only writings such as this of Charles Allen, which contained no controversial matter, could readily obtain a publisher.

"The first copy of this book was entitled "The Operator for the Teeth, showing how to Preserve the Teeth and Gums from all Accidents, as also the Description and Use of the Pelican, to which is annexed' A Physical Discourse, wherein the Reasons of the beating of the Pulse; or Pulsation of the Arteries, together with those of the Circulation of the Blood are explained, the Opinions of several Ancient and Modern Physicians and Philosophers, as Galien, Gassendus, Cartesius, Lower, Willis, &c. Printed in 1686 by Andrew Crook and Samuel Helsham for Robert Thornton, bookseller, at the Leather Bottel, Skinner's Row, Dublin." There are 58 pages and one leaf. At the bottom of page 44 appears "Printed in Dublin in the year 1686." The size is stated as 4to, 7 3/5 by 5 4/5. One copy of this edition is in the library of Trinity College, Dublin, and another in the possession of Dr. T. P. C. Kirkpatrick, Dublin.

"In the next year, 1687, another edition or reprint appeared, entitled "Curious observations in that difficult part of Chirurgery relating to the Teeth, showing How to Preserve the Teeth and Gums from all Accidents they are subject to." The size of this is somewhat smaller than the first, being 4to, 7 1/2 by 5 1/4, 1 leaf plus 58 pages plus 1 leaf, the last leaf being a list of contents. There are eight copies of this edition known to exist, namely, Trinity College, Dublin; Bodleian Library, Oxford; British Museum; Kings Inns, Dublin (this one bears the Imprimatur of the Archbishop on the verso of the title page); E. R. McC. Dix, Dublin; Marsh's Dublin; the Royal Irish Academy and that owned by Dr. Weinberger, of New York."

This interesting reprint of Charles Allen's work, and the accompanying introduction, is a worth-while addition to dental literature. It is issued, neatly bound, at the modest price of five shillings, and deserves a wide circulation.

MDCCLXX.

Title page of book by Thomas Berdmore, dentist to King George the Third. R. Woffendale was educated in Berdmore's office.

The volume closed with No. 18, December 1857, so as to begin the next volume with January. It made a very good beginning.

The second volume is filled with interesting matter. In the July number, 1858, we are informed of the passage, July 6, of a bill by the Legislature empowering the College of Surgeons to institute examinations, and to grant certificates of fitness to practice dental surgery. This raised dentistry to the dignity of a recognized profession.

In the third volume, August 1860, page 382, is a long account of a suit brought against the publisher of the journal. In the issue of November, 1858, an editorial entitled "Dental Puffing," (page 319) sharply criticised the advertisements of an Edinburgh dentist, claiming to be the inventor of several methods of painless tooth extraction. The dentist entered suit for defamation; damages were laid at one thousand pounds. The publisher refused to name the author of the editorial, and assumed full responsibility for the publication. The advertisements criticised were glaringly deceptive. Nevertheless, the dentist called to the witness stand patients who declared that his tooth extracting had been painless. Professor Simpson, who introduced chloroform as an anesthetic agent, testified in his favor, saying he had witnessed him operate, and that his methods were successful. Although the dentist, when on the witness stand, under cross examination freely admitted that part of his claims were false; the jury found for the prosecutor, awarding him as damages, one hundred pounds. The publisher was later reimbursed his expenses, and he and the journal were highly commended for the position taken. Ten pages are occupied with this report. The profession was so scandalized by such advertisements, from which all suffered, it seemed high time public attention was called to it.

Evidently the journal had passed through a crisis that many dental journals have encountered. Vol. II ends with No. 30, December 1858. Volume III begins with No. 37, July 1859. The journal was discontinued from January to June 1859, (Nos. 31 to 36). An editorial page 17, explains this:—"It is with some degree of pride and pleasure that we greet our readers at the opening of this, our third volume. Amidst the various attempts which have been made to sustain a dental periodical, we alone have succeeded in maintaining our ground for a period of three years, and we look forward with confident hope to a long-continued existence, supported and encouraged by our professional brethren, and the consciousness that we deserve their support, no trouble or expense being spared to render our pages instructive and attractive." The volume ends with No. 54, December 1860, and contains 18 numbers.

Volume IV begins with January 1861, No. 55, and ends with No. 66, December 1861. Like its predecessors it is well filled with carefully selected information.

Volume V is issued in a new form. Its former unwieldy size has been reduced to the usual dimensions of an octavo, much more convenient to handle and to read than the large, double column page.

Without further change the journal continued monthly until September 1879 (Vol. XXII, No. 279). The editorial in this number begins as follows:—"With this. the Student's Number for September 1st, 1879, the career of the "British Journal of Dental Science" closes—as a monthly journal. It will reappear with new life and fresh vigor, on the 15th of September, 1879, as a Bi-monthly or Fortnightly Journal. It has now existed twenty-two years, during twenty of which it has been conducted by its present editor, Charles James Fox. It has ever been in the van of the march of progress; and now on August 1st, 1879, Dentistry, as a branch of general surgery, has begun a new life—now that it is no longer to be the refuge of the unsuccessful in all other callings—now that, in the words of a western paper, it has risen to the ranks of a first class profession, we feel that the time has come when the British Journal of Dental Science must show itself though old in years yet young in spirit—old with the accumulated experience of twenty-two years, young in the

consciousness that a medium for more frequent communication between the members of our specialty is required—young in the recognition of the fact young minds are daily springing into existence who require space and frequent issue to give vent to the ideas that are teeming in their brains."

For a number of years the British Journal has made the September number "Students' number, publishing therein for the benefit of students information regarding the schools, the various subjects they are required to study, and the examinations they must successfully pass before entering into lawful practice, it seemed a fitting time to make the change.

In this same volume (1879) we are introduced to another step in professional advancement, the organization of the "British Dental Association," not as a competitor of the Odontological Society, but rather as a compeer, and as time has passed, they have worked harmoniously together. The Odontological Society of London was organized very much on the lines of a local society; the impression was abroad that its membership was exclusive; that there was need for an Association upon broader lines and national in character, one that could take in every dentist in Great Britain willing to conform to the provisions of the Dental Act. The British Journal of Dental Science while favoring the idea was cautious in endorsing the movement, fearing it might reopen the late unpleasantness. As the matter was discussed by leaders of the profession objections were overcome, and the British Dental Association was formally organized March 3, 1879, and incorporated June 3, 1880. This provided for a central representative body to have charge of matters of general interest, and branches throughout the country which managed their own local affairs.

July 1883, its owners began the publication of "The Advertising Circular." This was a monthly publication about the size of the journal, containing a few advertisements and abstracts from the journal, distributed gratuitously to dentists who were not subscribers, frequently changing the list so as to reach a large number, hoping thereby to increase its circulation and its advertising patronage. This was continued until about the close of 1884.

About the same time it began to use more freely abstracts and translations from other journals, giving variety to its contents.

It continued without material change until April 1, 1918, when, owing to conditions due to the World War, it became a monthly and has so continued.

With the December, 1924 number, it will complete volume LXVII, covering a period of sixty-eight eventful years in the history of Dental Science in Great Britain.

The Quarterly Journal of Dental Science

When the British Journal of Dental Science, which in the beginning of its career showed a friendly spirit towards those interested in the College of Dentists, became the property of gentlemen who were members of the Odontological Society, it was indispensable that the transactions of the college should be reported, and its claims fairly advocated by an independent publication. This want was eventually filled by the publication of the Quarterly Journal of Dental Science, under a proprietary of gentlemen practising as dentists. The undertaking was promulgated by Mr. James Robinson, who, with his usual spirit of determination, resolved that the college enterprise should not be written down or snuffed out without an earnest effort to prevent it. He cheerfully aided by becoming a co-proprietor, and with his purse and pen helped it forward to the best of his ability.

The first number appeared in April 1857, and the contents reflected credit on all concerned. It was edited by A. Hill, S. L. Rymer, W. Perkins, A. Thompson, and James Robinson. There was sufficient matter at that time to fill many of its pages, supplied by the college and its work alone. A regular staff of lecturers had been appointed for the instruction of its members, and as these lectures were delivered

PRACTICAL

OBSERVATIONS

ON THE

HUMAN TEETH.

By R. WOOFFENDALE,

Surgeon-Dentist, Liverpool.

LONDON,

Printed for J. Johnson, N°. 72, St. Paul's Church-Yard,
and Messrs. Richardson and Urquhart, Cornhill.

MDCCLXXXIII.

Title page of book by R. Woffendale, who came to America in 1766. He is credited with being the first foreigner, educated as a dentist, to come to America.

the "Quarterly Journal" published them, together with the proceedings of the various meetings and transactions of the college as they occurred.

Shortly after the advent of the Quarterly, an effort was made to unite the College of Dentists and the Odontological Society. Mr. Reid, of Edinburgh, on a visit to London during the summer of 1857, met with several professional friends, who deplored the division of the profession into two rival bodies, when unity was so essential. Thinking it over, the question arose within him: Could not a better understanding be effected between the two sections who, although estranged, were travelling in parallel lines while striving to attain the same end? He consulted with Mr. Tomes, suggesting a conference with Mr. Underwood, with a view to bring about a union acceptable to both sides. This resulted in a conference between representatives of the two organizations, who soon formulated a satisfactory agreement. This was considered, and accepted by the Odontological, but at a meeting of the College, called for the purpose of its consideration, it was rejected. This rejection was followed by the resignation from the College of several of its officers, and a number of its members. Unfortunately, during the resulting turmoil, the Quarterly indulged in comments and criticisms that shortened its career.

The Dental Review. (London)

The Dental Review was the second monthly dental journal published in Great Britain. It came into being on New Year's Day of 1859, taking the place of the Quarterly Journal of Dental Science, discontinued to make way for a more diplomatic champion of the College of Dentists than the Quarterly had been. At this time the dental profession was divided into two parties, both seeking the same objective; the Odontological Society seeking recognition by an alliance with the College of Surgeons; and the College of Dentists seeking for the profession an independent recognition. The monthly British Journal of Dental Science espoused the cause of the Odontological Society; the College of Dentists needed a monthly journal as its advocate, and no matter which won, unity in the profession was essential to future progress. This was being generally recognized; both sides were beginning to realize that fealty to either College or Society must be subordinate to fealty to the profession's best interests. It was wiser to begin a new journal, with editorial management in accord with this sentiment, than to continue one openly antagonistic. Mr. S. L. Rymer, and Mr. A. Hockley, were selected as editors.

The 765 pages of the first volume are filled with instructive matter, well arranged. The editorials are well written, and bring to the fore important topics of the day.

The second volume has 600 pages of well selected abstracts and original matter, illustrated when illustrations are needed.

The third volume, 1861. A reprint of "The Natural History of the Human Teeth," by John Hunter, edited by Francis C. Webb, is a feature of this volume; as is also "A Treatise upon the Genesis and Development of the Dental Follicles to the Epoch of Eruption of the Teeth," by Drs. Robin and Magitot. Each is divided into nine articles, distributed through the book.

Volume fourth, 1862. The reprint of Hunter, and the Treatise is continued through this volume. The death of Mr. James Robinson is noted on page 189. Mr. Robinson was among the first to urge the importance of the suggestions embodied in Mr. Waite's Appeal of 1841, in behalf of the dental profession. He issued and edited the first Dental Journal published in Great Britain, 1843; and also the second, 1844-5. All through the Reform movement he was conspicuous, active, and alert in forwarding professional betterment. His death was due to a slight wound received while working in his garden. He was in his 49th year.

Several references are made to the World's Fair, especially regarding the dental exhibits, and contrasting them with those of a like Fair, 1851. There is noted a

THE

BRITISH JOURNAL

OF

DENTAL SCIENCE.

VOL. I.

JULY, 1856—DECEMBER, 1857.

LONDON:

JOHN CHURCHILL, NEW BURLINGTON STREET.

Reproduction of title page of the first number of the British Journal of Dental Science, which is now (1924) the oldest dental journal in existence, continuing under its original title.

marked increase in the number of firms exhibiting dental supplies; advertising exhibits of dentists are criticised on ethical grounds, and also as showing a lack of artistic taste on the part of the exhibitors.

Volume fifth, 1863. The volume opens with an editorial entitled "Professional Union." It announces a proposal initiated by Mr. Rymer, long identified with the College of Dentists, looking to a union with the Odontological Society. Mr. John Tomes, President of the Society, had responded favorably to the suggestion. Practically, the issue between the two organizations had been settled by recent legislation, and the editor suggests "that it is a favorable time to end the turmoil that for six years has held apart two sections of the profession, alike in aim, but differing in sentiment. Each side has done well; by laying aside past differences and as earnestly working together, will assure a bright future for the profession."

On March 2nd, 1863, The Odontological Society, with but one decendent vote, approved the terms of amalgamation between the two Societies, arranged by a joint committee; March 20th 1863, at a special meeting of the College of Dentists called for the purpose, the College was legally and formally dissolved, its members, thereupon became members of the Odontological Society, their formal reception was at a meeting, May 4, 1863, and at the same time the Society, as a part of the agreement, became The Odontological Society of Great Britain.

The reprint of Hunter's work, and the Treatise of Robin and Magitot, is continued.

An editorial in the December number announces: "The change which has taken place in the political aspects of the profession seems to do away with the necessity of a monthly journal, and we have therefore deemed it expedient to return to the original form of publication. Henceforth The Dental Review will make its appearance quarterly. (1) This volume has 566 pages.

The Review continued as a quarterly until the November number, 1867, the completion of the tenth volume; it was then discontinued. Regarding this, the Dental Cosmos makes the following comment:—"It is much to be regretted that this magazine, after an existence of ten years, during which it has rendered valuable service to the dental profession in England, particularly as the able exponent and advocate of the College of Dentists, has been compelled, like the institution whose cause it so faithfully supported, to close its career. The editor of the Review says:—"Having failed to receive sufficient amount of literary support to justify him in continuing the journal, it terminates with the present number, after an existence, dating from its commencement in 1857, (1) of ten years."

(1) The ten years includes the life of The Quarterly Journal of Dental Science, its immediate predecessor.

Monthly Review of Dental Surgery

LATER,

The Journal of the British Dental Association

The Monthly Review of Dental Surgery, London, began its career, June, 1872. The editor, Mr. Oakley Coles, a distinguished London dentist and writer, thus introduces the new journal:—"In introducing this, our first issue of the Monthly Review of Dental Surgery, we offer no apology, since our object is to supply a want which has been urgently felt during late years, the want of an organ to adequately represent British Dental Surgery; to protect the interests of the dental profession; and to form a medium for the interchange of ideas between its individual members."

(1) The Quarterly Journal of Dental Science, was published in the interests of The College of Dentists; this was discontinued at the close of the second volume, and replaced by the Review, a monthly journal being deemed more desirable.

TRANSACTIONS

OF THE

ODONTOLOGICAL SOCIETY

OF LONDON.

1856-57.

LONDON
JOHN CHURCHILL, NEW BURLINGTON STREET.
MDCCCLVIII.

Title page of the first number of Transactions of the Odontological Society of London, published under this title until 1907, when it was changed to the Odontological Section of the Royal Society of Medicine.

The dental profession in Great Britain was just emerging from a long, acrimonious struggle over educational and legislative problems. A few far-seeing leaders, who had patiently waited until the struggle abated, had succeeded in harmonizing the factions. The Journal was needed "to earnestly advocate and strive to further every project which might lead to the advancement of the Dental Profession in this country; and we shall give our best support to all useful reforms," promised the editor for his supporters.

The journal was ably edited, and when the time was ripe, the second number of the ninth volume, February 1880, opens with the editor's valediction, and the announcement that the Monthly Review of Dental Surgery had passed from private ownership to become the property of the British Dental Association. (Organized, London, March 3rd, 1879. Incorporated June 3rd, 1880.) This provided for a central body; and for the wider diffusion of the benefits of the Association, including the formation of separate bodies or branches. These branches were to have such powers and privileges, and to be subject to such obligations, as should be determined from time to time by the association in General Meeting.

Mr. Coles was succeeded 1877 by Mr. Thomas Gaddes, who remained the editor until the change of ownership, March, 1880.

The Monthly Review of Dental Surgery really ended with No. 3, of Volume IX, March 1880. The next number, April 1880, is No. 2, Vol. I, of the "Review, as the Journal of the British Dental Association," it should have been No. 1, of the new series. (No. 1, of Vol. I, under the new name is non-existent. Such errors are often puzzling to collectors of periodic literature.) The paging is continuous through the volume.

With volume II, January 1881, the title reads:—"The Journal of the British Dental Association, a Monthly Review of Dental Surgery," and so remained until 1903, when it was changed to "The British Dental Journal."

For a number of years it made the building of the national association and extending its branches, its chief concern, and in so doing was an important factor in bringing about reforms and betterments that have done so much to advance the interests of the dental profession in Great Britain, and increase its usefulness to the community. During later years it has well earned a place among the foremost professional journals of the world.

Beginning with Vol. XX, 1899, the Journal appeared in new dress, with its page enlarged. With the close of the year 1924 it will complete Vol. XLV. It is current bimonthly, the change having been made a few years ago.

The Archives of Dentistry—London.

The receipt of the first number of this journal is acknowledged in "Books received," "British Journal of Dental Science," Vol. IX, April, 1866. It began 1865. Editor, Edwin Truman. Alfred Hill, in his history of the dental reform in Great Britain, page 373, suggests "that the ideal dental journal should contain as its main features, highly scientific and soundly practical papers on the many subjects which the profession includes in its various departments. An attempt was made to supply such reading for the dental profession in a publication entitled "The Archives of Dentistry," under the auspices of Mr. Edwin Truman; but that effort failed, only some few numbers appearing." A careful search through the dental journals of that period, has failed to find any notice of it. It was the only dental journal in Great Britain, up to that date, that was not actively concerned in professional politics associated with the reform movement. It evidently was not appreciated.

The British Journal of Dental Science, maneuvered through the storm by diplomatic generalship; the "Monthly Review" started when the storm had somewhat abated, and lives as the British Dental Journal. All before these were wrecked.

Dental Periodicals Published by Claudius Ash, Sons & Co., Ltd. (London).

Ash's Quarterly Circular appeared about 1884, and is referred to by writers of that period as a Dental Journal. It was simply a series of catalogues that hardly merited that designation, although highly useful to its publishers and their patrons. About 1901, it began to publish, in addition to advertisements, articles relating to various phases of dental practice, original and selected, and became a recognized professional journal.

The later successors of the Circular have improved very much in appearance, in "make up" and contents, and are worthy of a permanent place in a dental library.

Ash's Monthly was discontinued November 1916, owing to conditions due to the "World War," and was followed by Ash's Journal, a bimonthly, January 1917. This gave place to The Dental Magazine, bimonthly, January 1920. Current.

The Dental Record. (London)

The Dental Record. Published by the Dental Manufacturing Company, Limited, of London, Edited by Thomas Geddes, L.D.S. Eng. and Edin., began its long and successful career July 1, 1881. It was the first (so called) Dental Trade Journal to appear in England. It is now (1924) in its forty-fourth volume.

The preface announced "it was established, and would continue as a free and independent Journal, its pages open to all contributions possessing literary merit, and to correspondence on all topics of interest to the Dental Profession." Its advent was well timed. The long continued, and at times, acrimonious turmoil accompanying the great reform movement was settled. With the legal standing of the profession and its educational and society interests upon a firm basis, generally accepted as satisfactory, the new enterprise entered upon a fair field. It had no intangling past to hamper its editor and publishers in their proposal to make the Journal welcome to the home of every "English reading Dentist," as announced in its preface. It has faithfully kept that promise.

The first volume consists of six monthly numbers so as to commence the next volume with January.

Mr. Geddes continued as editor until near the close of the eighth volume, when he resigned preparatory to a change of residence from England to Palmer Lake, near Denver, Colorado, United States. Since then the name of the editor has seldom appeared on the title page. It remains as it began, a Monthly Dental Journal. Current.

The Student's Journal.

The Student's Journal began its short career, Vol. I, No. 1, second series, November 1894. It was published by the Liverpool Dental Hospital, monthly. The first volume had six numbers. The second nine, there it ended.

Regarding the first series, the preface to the first volume of the second series states, "That it was not seen outside the class room walls." Presumably, it was read at the students club meetings, and not published.

The Dentist. (London)

The Dentist, a monthly dental journal began January 1898, published by Hampton and Company, London. Subscription seven shillings per annum. No editor is named. It was announced as An Independent Journal Devoted to the Interests of the Dental Profession. Attractive in its make up, with short and varied articles printed in clear easily read type, it appealed to readers anxious to quickly get the gist of a month's progress. On an advertising page of the August number the fol-

lowing announcement appears:—"Ready on October 6th next, No. 1, of the Weekly Dentist. Price one penny, or six shillings per annum."

This was by the same publishers in response, they said, to a desire for a more frequent exchange of dental information. An editorial in the December number of the Dentist states that the Weekly was an experiment, and had proved beyond doubt that one was much needed and would be welcomed all over the country. By combining the two Journals they hoped to give former readers of each the advantages of both. (The Weekly Dentist began October 6, and ended by merging with the monthly, December 29, 1898.)

The Dentist began its second volume as a weekly, December 29, 1898, and ended it December 28, 1899. On page 566, announcement is made that the monthly publication known as The British Dental Journal will be incorporated with the Dentist, beginning with the current number, (September 7, 1899.)

With the third volume the title is changed to read:—The British Dental Journal and "The Dentist". It began Jan. 4, 1900, and ended September 20, the same year. No title page or index was furnished.

The Dental Surgeon.

The Dental Surgeon, A Weekly Review of Dental Science. Began November 5th, 1904. Published by Baillère, Tindall and Cox, London. Price 3 pence a number or 13 shillings to yearly subscribers.

The editor, Robert Manning, L.D.S., Eng., in his foreword says:—"In placing before the dental profession the first number of a new weekly journal, we are guided by the conviction that a more frequently published medium between practitioners of the dental art will find a welcome place." He gives various reasons for this belief, and refers to the oft quoted saying, that the majority of dentists do not read as much as their medical colleagues, giving as his opinion that such is the case, and offers as an explanation, "Because there is not so much for them to read."

The editor is supported by a full corps of collaborators. This journal having lived so much longer than any previous Weekly Dental Journal, calls for no further comment than the writer's congratulations. It has earned for itself a place among its compeers, and is still current.

The Mouth Mirror.

The Mouth Mirror. Published quarterly by the Incorporated Society of Unregistered Dentists. Oldham, near Manchester. Vol. I, No. 1, December 1904. Current.

This society was founded 1894, and incorporated 1896. About this time the unqualified dental practitioners of Great Britain were beginning to feel the restrictions placed upon them by dental legislation, as legal decisions interpreted its various provisions and additions thereto to their disadvantage. The qualified practitioners were urging the enforcement of these restrictions through their organizations and journals as a protection to the community.

To antagonize this trend the society was organized, and wisely limited its membership to unregistered practitioners of reputation and standing in the community, who for various reasons had not sought legal recognition. Many of them had by years of practice acquired skill, and were a credit to the community they served, and resented being disturbed by these new ideas. The society and journals gave them the mouth piece they lacked. That the Mouth Mirror is current after nearly twenty years is evidence that its supporters are in earnest. Its brilliant red covers symbolize a warning danger signal to those who seek to oppress them unduly.

It is needless to say the Mouth Mirror did not receive a cordial reception from the dental profession of Great Britain, nevertheless, the editorials of several journals

admitted its contentions were entitled to respect. The dental profession in many communities is facing a vexed problem. On the one side the importance of dental care as a health measure is being enforced as never before. On the other side the necessity for a more thorough education of dental students is demanded. The first calls for more dentists; the second reduces the output of the dental schools.

To meet this condition our English friends have resorted to an occasional "letting down the bars." While this has relieved the emergency, it has not solved the problem. The Report of the Committee appointed by the Lord President of the Council to enquire into the Extent and Gravity of the evils of Dental Practice by persons not qualified under the Dentists Act, published by His Majesty's Stationary office, London, 1919, gives an impartial, thoughtful and comprehensive view of this important question.

Minor Dental Journals.

Elliot's Quarterly. Published by Elliot and Co., dealers in dental supplies, Edinburgh and Newcastle-on-Tyne, for advertising purposes, began January 1904, and ended with volume XI, July 1914. The issues numbered consecutively, had about 70 pages, a few with abstracts of dental interest.

P. C. L. Quarterly. Published by C. J. Plucknett and Co., London, Dental Supplies, began June 15, 1910, and ended about 1915. Advertising.

Cotrell's Dental Chronicle. A journal to advertise its publishers business. London. Began April 1907, last issue March 1910. Seven numbers published.

Journals With Little or no Data.

Dental Monthly. London.

Dental News. London. Vol. I, No. 1, June 5, 1909. (Probably only number issued.)

Dental Practitioner. London. Vol. 2, No. 1, May 1918.

Edwards Dental Quarterly. London. Began January 1912, probably ended January 1915.

Stoddard's Dental Journal. Jamaica. No data.

The Dental Weekly. Vol. 1, No. 1, March 23, 1895. Published by Billings & Co., London.

Royal Dental Hospital Magazine. Began May 1922. Current.

Edinburgh Dental Student. Began 1900 (?) Only occasional numbers. Current.

The Ivory Cross Journal. Published Monthly. Edited by the Executive and Dental Committees of the Ivory Cross. An organization to supply dental relief to returned Army men. Began January 1919. Current.

The Odontological Society of Great Britain.

The record of events leading to the organization of the Odontological Society of London, (it was organized under this title,) is a long and very interesting story of an important, heterogenous, unorganized calling; having within its ranks the learned and the unlearned; some of ability, and others with neither skill nor knowledge of the science upon which the practice of the calling is based, striving for betterment. It was a long struggle undertaken by its qualified members to gain for themselves a recognition their attainments merited, and to protect the community they served, from the dangers associated with permitting incompetents to tamper with matters so intimately concerned with public health and well being as is the

practice of dental surgery. It is sufficient in this connection to direct those interested to an authentic, well written narration of its beginning and triumphant end, "The History of the Reform Movement in the Dental Profession in Great Britain during the last twenty years," by Alfred Hill; Trubner & Co., London, 1877. (Although long out of print, copies may be found in the larger dental libraries.) Mr. Hill took an active part in the movement, and was intimately acquainted with all its phases. He had access to all the records, and was assisted by its leaders—pro and con—in his efforts to preserve to posterity a correct history of the dental profession's rise in Great Britain, from a low estate, to a full, legal recognition as a specialty of medicine and surgery.

The organization of the Odontological Society of London, November 10th, 1856, marked the first success of this movement, in that it furnished to the profession in Great Britain, for the first time in its history, an organized, representative body with authority to plead its cause with the government, and an opportunity for its members to consult among themselves on all matters concerning its interests, its practice, and the arts and sciences upon which its practice is based.

The Society completed its organization November 10th, 1856, with Samuel Cartwright, F.R.S., President, and held its first regular meeting, January 5th, 1857. Its meetings were to be monthly, omitting the summer months.

The first volume of its proceedings covers the period from January 5th to August 3rd, 154 pages, with 13 full page plates, some colored, and 26 cuts with the text. A very good beginning.

The second volume, from November 2nd, 1857, to December 3rd, 1860, 391 pages, 2 colored plates, and 61 cuts.

The third volume begins with the annual general meeting, January 7th, 1861, to June 1, 1863. This volume contains a Prize Essay on the "Pathology of Dental Caries," by Mr. W. K. Bridgman, and several appendices upon the hard tissues of the human teeth. In all, 436 pages, and numerous illustrations. It covers the years 1861, 1862, and 1863.

Towards the close of the period covered by this volume, an important event in the annals of the profession developed, and was brought to a satisfactory conclusion. When the Society was organized the profession was divided as to the best means of bringing about legal recognition, fixing a standard of qualification, and providing educational facilities for prospective students. With many, the American plan of organizing special schools for instruction in dental surgery, and government recognition of a distinct dental degree was urged; and a Society organized under the title "The College of Dentists," intended to serve the Dental Profession in the same manner as did "The College of Surgeons," the profession of General Surgery. All overtures made to the College of Surgeons for aid in this matter were coldly received. When the President of that body was reminded that a number of its members were already in successful dental practice, he retorted, "Yes, I know, but we look upon them as seceders; we are ashamed of them." The Odontological Society sought recognition as a specialty of surgery. This want of harmony proved demoralizing.

The Odontological Society suggested a union of the two Societies, which was favorably received, and a meeting arranged of representatives of each society to consider the matter. A plan for union was formulated and submitted to each society. It was accepted by the Odontological Society; but rejected by the College of Dentists by a majority of seven negative votes. By this the College lost a number of their more prominent members. As time passed, the College received no encouragement that its proposals would be accepted. On the other hand the Society had intimations that a medical bill then before Parliament might be amended to include the dental profession. This encouraged the Society to renewed efforts. July 6th, 1858, while this bill, entitled "The Medical Practitioners Bill," was under discussion, a

XUM

clause was introduced empowering the College of Surgeons to institute examinations, and to grant certificates of fitness to practice dental surgery. (See, British Journal of Dental Science, Vol. II, July, 1858, page 302.) On Monday, August 2nd, 1858, the Royal assent was given to the Medical Practitioners Bill, which came into operation on the first of October, 1858. This raised dentistry from a questionable position, to the rank of a recognized profession. The Odontological Society had won.

The next effort was to heal the breach between the victor and the vanquished. Now that the college of surgeons were empowered to admit dentists to examination and association, those interested in the College of dentists realized that there was but little hope of a charter for a dental college, and that the most honorable course would be to endeavor to secure the cooperation of as many of their colleagues as possible, and unite with the Odontological on the best terms obtainable. The matter was arranged quietly and diplomatically. The union of the two bodies took place at a meeting of the Odontological Society, May 4th, 1863. The official list of members presented by the council of the College of dentists was read, and they were formally admitted to membership in the Odontological Society of Great Britain. (The new name was selected as being more expressive,) and the College of Dentists ceased to exist. The new name appears for the first time on the title page of volume three.

The fourth volume begins with the monthly meeting of November 2nd, 1863, and ends with that of June 5th, 1865, 317 pages, with a number of illustrations. Among the notable discussions, the various phases of cleft palate, and operations and appliances for its relief received marked attention. The presence of Dr. N. W. Kingsley, of New York, who described the appliances he had devised, and took an active part in the discussions, giving much information of practical value, was greatly appreciated.

Volume five, covers the years 1865-1866-1867; or from November 6th, 1865, to June 3rd, 1867, 407 pages, with 15 full page colored plates, and a number of others.

Volume sixth, 1867-1868; from November 4th, 1867, to June 1st, 1868, 258 pages, and illustrations.

New Series.

The next volume, entitled "Volume I, New Series," covers the proceedings from November 2nd, 1868, to June 7th, 1869.

Regarding this change, at the first meeting of the year, November, 1868, the President, James Parkinson, Esq., made the following announcement:—This is a convenient opportunity to inform the Society of a change about to take place in the publication of the proceedings and transactions. The council considered it very desirable that these should be in the possession of members as shortly after each meeting as practicable, and for that purpose it was proposed, if possible, during the current month after each meeting, to issue gratuitously to each member a printed account of such of their proceedings as might be considered interesting, together with the paper read and the discussions thereon, and in such a form that, at the end of each year they might be bound together into a volume in lieu of the transactions as heretofore issued. By this means they hoped to supply the members with a correct and early account of their monthly meetings, and also place them in more direct communication with the Society." (1)

As things were, a reader desiring to know of matters brought before the Society required to have before him the official proceedings and also The British Journal of Dental Science, and get a little from one and a little from the other. And furthermore, as the proceedings were not available until two or three years had accumulated, they were less valuable as records.

(1) British Journal of Dental Science, Vol. XI, June 1868, page 315; November 1868, page 565.

This volume contains the proceedings for one year, including the papers and discussions, 326 pages.

Volume II covers from November 1st, 1869, to June 6th, 1870, 313 pages.

Volume III, from November 7th, 1870, to June 1st, 1871, 258 pages. Three papers in this volume are of special interest; "The Position of Dental Surgery as a Profession," by Charles James Fox; "A Few Words on the Extraction of Teeth," by the same author; and "Some of the Difficulties and Accidents met with in the Practice of Dental Surgery," by Mr. W. A. N. Cattlin.

Volume IV, November 6th, 1871, to June 3rd, 1872, 231 pages. This volume contains an interesting paper by J. Oakley Coles, entitled, "The Production of Articulate Sounds," illustrated by 26 colored plates. The purpose of the paper was to show in a more satisfactory manner than heretofore had been done, the relative positions of the parts concerned in the production of speech; in order to enable those who have been treated by operation or mechanical appliances for cleft palate, to acquire a more accurate knowledge of the different sounds in the English alphabet; and also to enable the practitioner to determine on what is the cause of any defect in utterance of a patient, by being able to more accurately fix upon the locality which is imperfect in action." The author explains the simple, unique and accurate method by which the subject was studied.

Volume V, November 4th, 1872, to June 9th, 1873, 237 pages. The use of nitrous oxid as an anesthetic in dental practice received considerable attention at the society meetings. A number of devices to aid in its use were exhibited. A case of death during its use was reported, but as a post-mortem was not permitted, whether or not it was due to the anesthetic, or to some other cause could not be determined.

Volume VI, November 3rd, 1873, to June 1st, 1874, 280 pages, with the addition of 16 pages and 7 full page plates, entitled "Pathological Series." An interesting address by the President, gives a resume of dental history, and an outline of the society's origin and progress.

Volume VII, November 2nd, 1874, to June 7, 1875, 310 pages, with a few of the pathological series. The use of vulcanized rubber, and the danger of injury from the vermilion used as a pigment, is considered at some length. A short paper "On Matters Pertaining to the Practice of Dental Surgery in Egypt," by Robert Waller, of Cairo, and Alfred Coleman, of London, is of interest. A caricature, "Transplantation," executed by Rowlandson, 1787, appears as an illustration, accompanied by an explanation of the drawing, and the operation.

Volume VIII, November 1st, 1875, to June 12th, 1876, 280 pages, with 5 full page illustrations. Amalgam, pulp treatment, antiseptic dental surgery, dental histology, and large gold fillings, are the more prominent subjects noted.

Volume IX, November 6th, 1876, to June 4th, 1877, 275 pages, with 5 full page plates.

This volume opens with a paper and discussion on "Alveolar Abscess, dependent on Diseased Teeth;" followed by one "On Treatment and Extraction of the Tooth-pulp," from a very different view point; subjects prominently before the profession fifty years later. Over forty pages are occupied by an interesting "Summary of Cases where Artificial Teeth have been Swallowed, or have become Impacted in the Pharynx," compiled by Felix Weiss, L.D.S., and a discussion thereon, illustrated with cuts of recovered dentures, makes interesting reading. While a rare accident on this side, it is not so infrequent in European practice; it is wise for every dental practitioner to be well posted, and ready to act promptly when such emergencies present. There is also a report from a committee appointed to consider the probability of mercurial poisoning from wearing dentures of colored vulcanite. After a thorough examination of the matter, they reached the conclusion, "That in

a small percentage of cases vulcanite may exercise some irritating effects upon the tissues with which it is in immediate contact; there is not the smallest evidence these effects are due to its chemical composition or, at all events, to the vermillion it contains."

Looking backward; the society came into existence when the profession was unorganized, indeed, almost demoralized by discordant factions, anxious for betterment, but lacking a common objective. Those who became its leaders patiently waited until a way opened to reach a desired objective. This attained, harmony followed, and the profession gained its well merited position as a specialty of medicine and surgery.

Transactions of the College of Dentists of England.

1857 to 1861. Transactions of the College of Dentists of England; editors, A. Hill, S. L. Rymer, and A. Hockley. London.

The above is noted by Mr. Oakley Coles, in his List of Works on Dentistry, 1883, as being in the Library of the Odontological Society of Great Britain. The College of Dentists formally dissolved April, 1863, and its members were admitted into the Odontological Society, May 4, the same year.

The Australian Journal of Dentistry.

The Australian Journal of Dentistry. Melbourne, Victoria, Australia. Monthly. Began August, 1897. Published by The Australian College of Dentistry, and The Melbourne Dental Hospital. Editor, John Iliffe.

This pioneer Dental Journal is now closing its XXVIII volume. It has well held its own as a guardian of professional interests, quietly and steadily, keeping on the "job."

Vol. VIII has five numbers only, ending with December, 1904, so as to begin the next volume with January, 1905.

Owing to a printers strike, the numbers for February and March, Vol. XXIV, 1920, were not published. (See note page 23, April number, 1920.) Error, Vol. X, 1906, the covers of May and June are marked Vol. XI. With volume twenty-two, 1918, W. J. Tuckfield, M.A.C.D., became the editor, with G. Finlay, L.D.S., B.D.Sc., Sub Editor. Current.

The Commonwealth Dental Review.

The Commonwealth Dental Review. Sydney, Australia, Monthly. Began November, 1903, ended with Vol. XVII, December, 1920.

Federal Dental Journal of Australia. Began May, 1906, ended April, 1907.

The Mouth Mirror. Melbourne. Australia. Began January, 1908. Current.

The Dental Science Journal of Australia. Monthly. Current. Began January, 1921.

Dental Summary, Australian Edition.

Dental Summary, Australian Edition. Began June, 1920, Current.

At a meeting of the Dental Association of New South Wales, at Sydney, January 15, 1920, the Secretary reported that the Executive had decided to issue a Journal under the aegis of the Association. He explained that the Association had secured the publication rights of one of the most influential dental magazines in the English speaking world, and that a supplement of topical interest would be included in each issue. At the next monthly meeting of the Association, Feb. 5, the matter was discussed, approved, and an Advisory Publication Committee appointed. It was explained, "The publication rights had been secured absolutely free of costs,

and the Association would incur no liabilities other than the cost of printing and circulating the Australian edition." (1)

The New Zealand Dental Journal.

The New Zealand Dental Journal. Wellington, New Zealand. Quarterly. Began July, 1905. Became bimonthly September, 1912. Current.

The Journal of the Times. (Halifax, N. S.)

The Journal of the Times. Published quarterly by Drs. Macallaster and Paine, Dentists, Halifax, N. S., a quarto, the printed page 10 x 7 inches. While its primal purpose was to advertise its publishers' business, their advertisements are not obtrusive, nor markedly objectionable from an ethical standpoint.

The reading matter is well selected from medical and dental journals, and general literature, making it instructive and interesting.

Vol. I, No. 1, September, 1858, has 4 pages. No. 2, December, 1858, 4 pages. No. 3, March, 1859, 8 pages. No. 4, June, 1859, 4 pages.

Vol. II, No. 1, September, 1859, 8 pages. No. 2, December, 1859, 4 pages. Nos. 3 and 4, May and June, a double number, 8 pages, completes the volume, and presumably, ends the journal.

The Canada Journal of Dental Science.

The Canada Journal of Dental Science, Monthly. Began June, 1868, at Montreal. Published by George William Beers, who with J. Stewart Scott, M. D., of Toronto, were its editors. The advent of this pioneer dental journal of Canada was part of a movement for betterment, during which the dental profession in Canada was organized, legislation for its protection formulated and enacted, and a foundation laid for its present and future educational needs, Vol. I, consisted of twelve monthly numbers, June, 1868, to May, 1869.

Vol. II, June, 1869, to May, 1870.

Vol. III, Began Nov. 1870, and ended May, 1872.

Vol. IV, consisted of four numbers, dated as follows:—No. 1, August, 1877. No. 2, November, 1877. No. 3, March, 1878. No. 4, August, 1879, with this the journal ended.

The irregularities of the later issues were doubtless due to Dr. Beers being abroad, introducing a new form of athletic sport, in which he was intensely interested.

Dominion Dental Journal.

Dominion Dental Journal. Toronto, Canada. Quarterly. Began January 15, 1889. One dollar per annum. Current.

William George Beers, L.D.S., Editor in chief, Montreal; assisted by C. S. Chittenden, L.D.S., and A. C. Cogswell, D.D.S.

Beginning with the third volume, January, 1891, it was issued bimonthly. It became a monthly with the fifth volume, January, 1893, and has so continued to date. About 1901, the page was enlarged by increasing the margins, the printed page remaining about the same. This was an improvement, permitting the bound volume to open more freely, and also allowing the addition of a few lines to the printed page when needed. It returned to its original size with Vol. XXIX, January, 1917. It is now publishing its thirty-sixth volume. Dr. Beers continued as editor until his death, December 26, 1900. His successor, A. E. Webster, M.D., D.D.S., L.D.S., is the present editor.

(1) The Commonwealth Dental Review, Vol. XVII, Feb. 1920, page 59; March 1920, page 107.

Although there was quite an interval between the close of the first and the advent of the second, the close relationship between the Canada Journal of Dental Science and the Dominion Dental Journal, warrants assuming the Dominion Journal a new series of its predecessor. The same group of leaders who organized the Dental Profession in Canada, secured for it legal recognition and protection, established its first Journal, and laid the foundation of its educational institutions, were later prominent in founding the second journal, which for so many years has been an important factor in the profession's progress and uplift.

Bya Yaka.

Bya Yaka. Toronto. Published by a Fraternity of the Royal College of Dental Surgeons of Ontario. Began October, 1903. Current.

The Family Dentist.

The Family Dentist. S. S. Blodgett, Editor and Proprietor. "This is the title of a neat little monthly hailing from Brockville, C. W. As the first dental periodical that we have seen, published by our neighbors over the border, we welcome it as the harbinger of a more correct and healthy public sentiment in matters pertaining to dental practice." New York Dental Recorder, Vol. VIII, June, 1854, page 132.

Ash's Canadian Monthly Circular.

Ash's Canadian Monthly Circular. Began as a monthly circular 1910, and ended as a quarterly September, 1919.

Dental Practice.

Dental Practice, a monthly Journal published in the interest of the Dental Profession of the United States and Canada. Began 1906, published at Toronto. Editor, Robert J. Reade, M.A., L.D.S., D.D.S.

The monthly numbers consist of approximately 40 pages; the years numbers are divided into two volumes, January to June, July to December. The neglect of its publishers to provide a title page and index for each volume, impairs very much the usefulness of the journal.

The leading article in the number for September, 1907, (Vol. III, No. 3) entitled "A Review," by C. W. Stainton, D.D.S., is a well written reminiscence, crowded with important historic data. The journal ended its dental career by merging with a Medical Journal.

Oral Health.

Oral Health. Monthly. Toronto. Began, January, 1911. Current. Editors, Wallace Seccombe, D.D.S., Toronto, Ont.

George K. Thomson, D.D.S., Halifax, N. S. "A Journal that stands for the "Ounce of Prevention" as well as the "Pound of Cure." This motto, on the first page of each number announces the purpose and the field of this natty little journal. It came into being as a recognition of the importance of a healthy mouth as a prerequisite to Good Health. This is enforced, artistically, on its front cover design, showing the archway to Good Health, one pier supported by Dentistry, Medicine and Chemistry; the other by Biology, Engineering and Sanitary Science. Later, the name of these fundamental sciences has been removed from the design. They are still important factors in attaining and maintaining good health in the individual and the community. The contents of the journal, original and selected, are well chosen, interesting and instructive, keeping its readers informed regarding the various efforts to extend the benefits of Oral Health.

Revue Dentaire Canadienne

Revue Dentaire Canadienne. Le Seul Journal Dentaire Francais D'Amerique. Montreal, Canada. Editor, Dr. H. Thibault. Subscription $1.50 par annee. Began January, 1916 (?).

The American Dentist. (India.)

The American Dentist. Monthly. Calcutta, India. Began January, 1890. Three numbers are known. Editor and proprietor, R. H. Lamb, D.D.S. This journal is folio in length or heighth, and a little more than octavo in width; an odd and inconvenient size for a dental journal. It is for English readers.

THE INDEX

DENTAL BOOKS

The following is a list of dental books reviewed in the years 1876-85 inclusive in the dental journals covered by this Index. For each book, references are given to the reviews in the several journals.

The books are classified under the following headings:

General Works.
Compends.
Dictionaries, Directories.
Literature, Indices.
Proceedings of Dental Societies.
Historical.
Dental Anatomy and Physiology.
Operative Dentistry.
Prosthetic Dentistry.
Dental Chemistry and Metallurgy.
Orthodontia.
Oral Hygiene, Public Education.
Dental Pathology and Bacteriology.
Materia Medica and Therapeutics.
Oral Surgery.
Anesthesia.
Dental Jurisprudence and Ethics.
Dental Economics.

Not only first editions, but all subsequent editions are included in this list.

General Works

The Student's Guide to Dental Anatomy and Surgery. Sewill, Henry. Phila.: Lindsay & Blakiston. London: J. & A. Churchill. Advertiser (Dental), VII, 1876, 171-172; Amer. Jnl. Den. Sci., X, 3rd Ser., 1876-77, 474-475; Den. Cosmos, XVIII, 1876, 265-266; Johnstons' Den. Misc., III, 1876, 237-238; Mo. Den. Jnl., VIII, 1876, 326-328; Canada Jnl. Den. Sci., IV, 1877-78-79, 25-26. Second Edition, 1883. Brit. Den. Assn. Jnl., IV, 1883, 168-169; Den. Cosmos, XXV, 1883, 265; Den. Record, III, 1883, 242-244; Brit. Jnl. Den. Sci., XXVII, 1884, 271-272.

The Dental Student's Note Book. Coles, Oakley. London: George Butcher. Phila.: Lindsay & Blakiston. Brit. Jnl. Den. Sci., XIX, 1876, 385. Second Edition, 1880. Den. Cosmos, XXII, 1880, 144.

Notes From a Dentist's Case Book. Weiss, Felix. London: J. & A. Churchill. Brit. Jnl. Den. Sci., XX, 1877, 496; Monthly Rev. of Den. Surg., VI, 1877, 53.

The Mouth and the Teeth. White, J. W. Phila.: Lindsay & Blakiston. Den. Cosmos, XXI, 1879, 636-637; Advertiser (Dental), XI, 1880, 65; Mo. Den. Jnl., XII, 1880, 94.

Beitrage zur Zahnheilkunde; neun Abhandlungen. (Contributions to Dental Science; Nine Lectures.) Hollander, Ludwig H. Leipzig: Verlag von Arthur Felix. Brit. Den. Assn. Jnl., II, 1881, 607; Brit. Jnl. Den. Sci., XXIV, 1881, 1093-1097; Brit. Jnl. Den. Sci., XXV, 1882, 75-79.

Manual of Dental Surgery and Pathology. Coleman, Alfred. Revised by T. C. Stellwagen. London: Smith, Elder & Co. Phila.: Henry C. Lea's Son & Co. St. Louis: H. R. Hildreth Printing Co. Brit. Jnl. Den. Sci., XXIV, 1881, 841-844, 932-934; Den. Record, I, 1881, 200-202, 250-251. Vol. II, 44-45; Advertiser (Dental), XIII, 1882, 117. Amer. Jnl. Den. Sci., XVI, 3rd Ser., 1882-83, 92-93; Brit. Den. Assn. Jnl., III, 1882, 20-23; Den. Cosmos, XXIV, 1882, 265-266; Herald of Dentistry, II, 1882-83, July, 4; Indep. Pract. (Dental); III, 1882, 415; Den. Jairus, III, 1882, 292; Den. Luminary, IV, 1882-83, 8; Mo. Den. Jnl., XIV, 1882, 236; New Eng. Jnl. Den., I, 1882, 207-208; Odontographic Jnl., III, 1882-83, 63-64; Ohio S. Jnl. Den. Sci., II, 1882, 302-303; Southern Den. Jnl., I, 1882-83, 176; Cinn. Med. & Den. Jnl., I, 1885, 96.

Odontologische Forschungen. (Odontological Investigations.) Baume, Robert. Leipzig. Arthur Felix. Den. Cosmos, XXIV, 1882, 660-668.

Ueber das Stadium der Zahnheilkunde in England.—Methods of Study and Practice in the Dental Departments of the Hospital of England. Sternfeld, Alfred. Munchen. Brit. Den. Assn. Jnl., IV, 1883, 169; Den. Cosmos, XXV, 1883, 265-266.

Dental Vade Mecum. Hardie, James. Glasgow: William Collins, Sons & Co. Fourth Edition, 1883. Den. Cosmos, XXV, 1883, 264-265.

The Teeth; Their Formation, Diseases and Treatment. Gaddes, Thomas. England: David Bogue. Den. Record, III, 1883, 541-542; Brit. Den. Assn. Jnl., V, 1884, 26.

Notes on Dental Practice. Quimby, Henry C. Phila.: S. S. White Den. Mfg. Co. London: J. & A. Churchill. Advertiser (Dental), XV, 1884, 97; Amer. Jnl. Den. Sci., XVIII, 3rd Ser., 1884-85, 44; Archives of Den., I, 1884, 190; Brit. Den. Assn. Jnl., V, 1884, 151-154; Brit. Jnl. Den. Sci., XXVII, 1884, 974; Den. Cosmos, XXVI, 1884, 250-252; Den. Headlight, V, 1884, 114; Indep. Pract. (Dental), V, 1884, 333-334; Odontographic Jnl., V, 1884-85, 211; Den. Record, IV 1884, 153-158; Den. Register, XXXVIII, 1884, 314-316; Southern Den. Jnl., III, 1884-85, 263-264.

Principles and Practice of Dentistry. Harris, Chapin A. Phila.: P. Blakiston, Son & Co. London: J. & A. Churchill. Eleventh Edition, Revised and Edited by Ferdinand J. S. Gorgas. Amer. Jnl. Den. Sci., XVIII, 3rd Ser., 1884-85, 426-428, 505-511; Den. News, (Knightstown, Ind.), VII, 1884-85, March, 153; Advertiser (Dental), XVI, 1885, 65-66; Archives of Den., II, 1885, 235-236, 282-283, 284-285. Brit. Den. Assn. Jnl., VI, 1885, 292-298; Brit. Jnl. Den. Sci., XXVIII, 1885, 698-700; Den. Cosmos, XXVII, 1885, 179-180; Indep. Pract. (Dental), VI, 1885, 211-214; Den. Luminary, VII, 1885, 5; Ohio S. Jnl. Den. Sci., V, 1885, 256; Practitioner (Dental), III, 1885, 71-72; Den. Register, XXXIX, 1885, 530-532; Southern Den. Jnl., IV, 1885, 131-132.

Aide Memoire du Chirurgien Dentiste. Dubois, Paul. Paris: Delahaye & Lecrosnier. Brit. Jnl. Den. Sci., XXVIII, 1885, 318-320; Den. Cosmos, XXVII, 1885, 45.

Dental Surgery for General Practitioners and Students of Medicine. Barrett, Ashley W. Phila.: P. Blakiston, Son & Co. St. Louis: J. H. Chambers & Co. London: H. K. Lewis. Advertiser (Dental), XVI, 1885, 66; Archives of Den., II, 1885, 236-237; Brit. Den. Assn. Jnl., VI, 1885, 90-91; Den. Cosmos, XXVII, 1885, 182; Indep. Pract. (Dental), VI 1885, 215; Den. Record, V, 1885, 241-243; Den. Register, XXXIX, 1885, 584.

Compends

A Series of Questions Pertaining to the Curriculum of the Dental Student. Gorgas, Ferdinand J. S. Baltimore: W. K. Boyle & Son. Amer. Jnl. Den. Sci. XIX, 3rd Ser., 1885, 283; Practitioner (Dental), III, 1885, 286-287.

Dental Dictionaries and Directories

Dental Almanac for 1877. An Alphabetical List of Dental Practitioners in Prussia. With Three Portraits on Steel. Petermann, Adolf. Advertiser (Dental), VIII, 1877, 109; Brit. Jnl. Den. Sci., XX, 1877, 118-119; Johnstons' Den. Misc., IV, 1877, 158-159.

A Dictionary of Medical Terminology, Dental Surgery and the Collateral Sciences. Harris, Chapin A. Phila.: Lindsay & Blakiston. Fourth Edition. Revised by F. J. S. Gorgas. Amer. Jnl. Den. Sci., XI, 3rd Ser., 1877-78, 425-426. 331, Ed: Canada Jnl. Den. Sci., IV, 1877-78-79, 103; Johnstons' Den. Misc., IV, 1877, 479; Mo. Den. Jnl., IX, 1877, 632-633; Advertiser (Dental), IX, 1878, 8; Den. Cosmos, XX, 1878, 66-67.

List of Members of the Odontological Society of Great Britain. London: Wyman & Sons. Johnstons' Den. Misc., IV, 1877, 158.

Dr. Adolf Petermann's Dental Almanac, 1879. Containing Alphabetically the Names and Addresses of More than 600 Dentists Practicing in Germany, Austria, and Hungary. Frankfort: John Alt. Advertiser (Dental), X, 1879, 61; Den. Register, XXXIII, 1879, 219-221.

Zahnarztlicher Almanach, 1880. Register of Dentists of Germany and Austro-Hungary. Petermann, Adolph. Advertiser (Dental), XI, 1880, 66; Den. Cosmos, XXII, 1880. 144.

Dental Almanac for 1881. Petermann, Adolph. Advertiser (Dental), XII, 1881, 79; Brit. Jnl. Den. Sci., XXIV, 1881, 377; Den. Cosmos, XXIII, 1881, 276; Mo. Den. Jnl., XIII, 1881, 286; Den. Register, XXXV, 1881, 217-218.

The Dentists' Register, 1883. Brit. Den. Assn. Jnl., IV, 1883, 127-128.

Beecher's Manual and Dental Directory of the United States. Beecher, M. P. Knightstown, Ind.: Trow Printing Co. New York: Beecher & Co. Den. Cosmos, XXVI, 1884, 571; Den. News, (Knightstown, Ind.), VII, 1884-85, 20; Indep. Pract. (Dental), V, 1884, 649; Den. Luminary, VI, 1884-85, 60; Practitioner (Dental), II, 1884, 215.

Zahnarztlicher Almanach for 1885. Containing Lists of Dentists in Actual Practice in Prussia, Austria, and Hungary. Petermann, Adolph. Advertiser (Dental), XVI, 1885, 66.

Literature, Indices

A Catalogue of American and British Books, Embracing Periodicals, Transactions, Etc., Relating to Medicine, Surgery, Dentistry, Pharmacy, Chemistry and Kindred Subjects, Classified by Subjects, With an Index by Authors. Cincinnati, Ohio: Robert Clarke & Co. Den. Register, XXXII, 1878, 438.

Index to the Dental Cosmos. Volumes I to XXIV, Inclusive. Dexter, James E. and Northrop, A. L. Phila.: S. S. White Dental Mfg. Co. Amer. Jnl. Den. Sci., XVIII, 3rd Ser., 1884-85, 378; Brit. Den. Assn. Jnl., V, 1884, 719; Den. Luminary, VI, 1884-85, 90;Odontographic Jnl., V, 1884-85, 212; Practitioner Dental), II, 1884, 264; Den. Record, IV, 1884, 531-532; Den. Register, XXXVIII, 1884. 624; Southern Den. Jnl., III, 1884-85, 483-484; Advertiser (Dental), XVI, 1885, 30; Archives of Den., II, 1885, 39; Brit. Jnl. Den. Sci., XXVIII, 1885, 166; Den. Headlight, VI, 1885, 71-72; Indep. Pract. (Dental), VI, 1885, 52-53.

Index Catalogue of the Library of the Surgeon General's Office, United States Army. Den. Cosmos, XXVI, 1884, 747.

Dental Bibliography. A Standard Reference List of Books on Dentistry Published Throughout the World from 1536 to 1885. Crowley, C. Geo. Phila.. S. S. White Den. Mfg. Co. Amer. Jnl. Den. Sci., XIX, 3rd Ser., 1885, 334; Brit. Jnl. Den Sci., XXVIII, 1885, 1134-1135; Den. Cosmos, XXVII, 1885, 692-693; Den. Luminary, VII, 1885, 62; Practitioner (Dental), III, 1885, 286; Den. Register, XXXIX, 1885, 636-638.

Proceedings of Dental Societies

A list of the proceedings of dental societies published during the period covered by this index may be found in the list of journals included in the Index.

Historical

The History of the Reform movement in the Dental Profession in Great Britian During the Last Twenty years. Hill, Alfred. London: Trubner & Co. Brit. Jnl. Den. Sci., XX, 1877, 70-72, 90-91. 194-197, 263-267.

A History of Dental and Oral Science in America. Dexter, James E. Phila.: Samuel S. White. Amer. Jnl. Den. Sci., X, 3rd Ser., 1876-77, 377; Den. Cosmos, XVIII, 1876, 491-492; Advertiser (Dental), VIII, 1877, 5-6; Johnstons' Den. Misc., IV, 1877, 117-118; Mo. Den. Jnl., IX, 1877, 79.

History of Dentistry in California. Trailkill, W.O. Den. Jairus, II, 1881, 277-279; 450-456, 1 illus. 1 portrait.

Dental Anatomy and Physiology

A Manual of Dental Anatomy, Human and Comparative. Tomes, Charles S. Phila.: Lindsay & Blakiston. Amer. Jnl. Den. Sci., X, 3rd Ser., 1876-77, 376-377; Johnstons' Den. Misc., III, 1876, 476-479; Monthly Rev. of Den. Surg., V, 1876-77, 388-390, 432-437; Advertiser (Dental), VIII, 1877, 5; Den. Cosmos, XIX, 1877, 42-45; Monthly Rev. of Den. Surg., VII, 1878, 53-54. Second Edition, 1882. Advertiser (Dental), XIII. 1882, 116-117; Amer. Jnl. Den. Sci., XVI, 3rd Ser., 1882-83, 93; Brit. Den. Assn. Jnl., III, 1882, 114-116; Den. Cosmos, XXIV, 1882, 219-229; Mo. Den. Jnl., XIV, 1882, 235-236; Ohio S. Jnl. Den. Sci., II, 1882, 200; Den. Record, II, 1882, 347-351, 405-408; Den. Register, XXXVI, 1882, 308.

Questions on the Structure and Development of the Human Teeth. Ford, C. L. Ann Arbor: Fisk & Douglas. Amer. Jnl. Den. Sci., IX, 3rd Ser., 1876, 429; Johnstons' Den. Misc., III, 1876, 79-80; Amer. Jnl. Den. Sci., XII, 3rd Ser., 1878-79, 236.

An Anatomical Description of the Permanent Teeth. Judd, H. Den. Cosmos, XIX, 1877, 216-217; Johnstons' Den. Misc., IV, 1877, 119.

Treatise Upon the Anomalies of the Dental System of Man and Animals. With Atlas of Twenty Plates. Magitot, E. Paris: G. Masson. Den. Cosmos, XX, 1878, 121-123.

The Origin and Formation of the Dental Follicle. Legros, Charles and Magitot, E. Translated by M. S. Dean. Chicago: Jansen, McClurg & Co. Amer. Jnl. Den. Sci., XIII, 3rd Ser., 1879-80, 332-333; Den. Cosmos, XXI, 1879, 634-636; Mo. Den. Jnl., XI, 1879, 542; Den. Register, XXXIII, 1879, 445-447; Advertiser (Dental), XI, 1880, 115-116; Den. Jairus, I, 1880, 236; Brit. Den. Assn. Jnl., II, 1881, 552-558; Brit. Den. Assn. Jnl., III, 1882, 65-73, 107-114. 1 table. Ohio S. Jnl. Den. Sci., I, 1881, 187.

Horses' Teeth. A Treatise on Their Mode of Development, Physiological Relations, Anatomy, Microscopical Character, Pathology and Dentistry. Clarke, William H. New York: Wm. R. Jenkins. Amer. Jnl. Den. Sci., XIV, 3rd Ser., 1880-81, 478; Advertiser (Dental), XII, 1881, 79; Johnstons' Den. Misc., VIII, 1881, 44-46; Mo. Den. Jnl., XIII, 1881, 144; Den. News, (Knightstown, Ind.), IV, 1881-82, 18. Second Edition, 1884. Advertiser (Dental), XV, 1884, 34; Den. Cosmos, XXVI, 1884, 54.

The Student's Guide to Dental Anatomy and Surgery. Sewill, Henry. Second Edition, 1883. Den. Cosmos, XXV, 1883, 265.

Die Kiefer Fragments von La Naulette und aus der Schipkahohle. (Bone Fragments of La Naulette and the Schipka-Cave.) Baume, Robert. Leipzig: Arthur Felix. Den. Cosmos, XXV, 1883, 551-552.

The Minute Anatomy, Physiology and Therapeutics of the Dental Pulp. Bodecker, C. F. W. Indep. Pract. (Dental), IV, 1883, 115-116.

The Minute Anatomy of the Teeth in the Light of the Bioplasson Theory. Heitzman, Carl. Indep. Pract. (Dental), IV, 1883, 115-116.

An Examination Into the Condition of Certain Pre-Historic American Races. Barrett, W. C. Mo. Den. Jnl., XV, 1883, Nov., 383; Southern Den. Jnl., III, 1884-85, 67.

A New Method of Recording the Motions of the Soft Palate. Allen, Harrison. Phila.: P. Blakiston, Son & Co. Den. Headlight, VI, 1885, 72.

Operative Dentistry

A Practical Treatise on Operative Dentistry. Taft, Jonathan. Phila.: Lindsay & Blakiston. Buffalo: Buffalo Den. Mfg. Co. Third Edition, 1877. Advertiser (Dental), VIII, 1877, 108; Amer. Jnl. Den. Sci., XI, 3rd Ser., 1877-78, 44-45; Canada Jnl. Den. Sci., IV, 1877-78-79, 26; Den. Cosmos, XIX, 1877, 214-216. Fourth Edition, 1882-83. Amer. Jnl. Den. Sci., XVI, 3rd Ser., 1882-83, 427-428; Den. Jairus, III, 1882, 293; Advertiser (Dental), XIV, 1883, 65; Den. Cosmos, XXV, 1883, 102-105; Indep. Pract. (Dental), IV, 1883, 182-183; New Eng. Jnl., Den., II, 1883, 127-128; Ohio S. Jnl. Den. Sci., III, 1883, 150-151; Den. Register, XXXVII, 1883, 48.

Laboratory Account Book for Dentistry. Coxon, Stephen A. Den. Record, V, 1885, 530-531.

Classified Subject Index

To All Periodical Dental Literature Published in the English Language for the Years 1876-1885, inclusive

Directions for using this index will be found in the appendix printed on the pink sheets inserted between this classified subject index and the personal or author index.

Articles are grouped by subjects, irrespective of the wording of the titles. To find the articles on a given subject, look in the **Index to the Classification** printed on the pink sheets. For each subject the page, on which the list of articles will be found, is indicated.

Under each subject heading, the articles are listed according to the journals in which they appeared and the journals are arranged in alphabetical order. It is, therefore, convenient for one to find the articles which appeared in one or several journals on a particular subject, without having to look over those published in other journals.

The articles as listed for each subject in each journal are arranged in chronological order, a great convenience when one desires to make a thorough review of the writings on a subject.

The index includes not only original articles, but practically everything published—editorials, correspondence, abstracts, articles reprinted from other journals, reports of clinics, etc.

For each article, the first and last pages are entered, thus giving its length; also the number of illustrations. If a paper was discussed before a Society, the first and last pages of the discussion are entered with the article. If corrections were later published, these are also indexed with the article.

Under the various headings of the Classified Index, many cross references will be found to related subjects.

A **Personal** or **Author Index** will be found immediately following the pink appendix.

Dentition in the Horse and Other Animals. Williams. 495-499. Selected.

Iowa State Den. Soc. Trans., 1880.
Specimens of Shark's Teeth. Ingersoll. 18-20.

Items of Interest (Dental), I, 1879.
Development of the Teeth of Cattle. 1. Selected.

Items of Interest (Dental), III, 1881.
The Teeth of Alligators. 26.
The Teeth of Animals. 61. Selected.
The Teeth of Elephants. 61. Ed.

Items of Interest (Dental), IV, 1882.
The Teeth of Some Animals. 27.
Dentition in the Horse and Other Animals. Williams. 122. Selected.

Items of Interest (Dental), V, 1883.
Dentition in the Horse and Other Animals. Williams. 53-54. Selected.
The Mammalia. 374-375. Ed.

Items of Interest (Dental), VI, 1884.
Dentition as Indicative of the Age of the Animals of the Farm. Brown, G. T. 76-77. Selected.
The Review of the Invertebrate Animals. Gaddes, Thomas. 83-84.

Items of Interest (Dental), VII, 1885.
American Type of Teeth. Kingsbury, C. A. 304-305. Selected.
Teeth of Reptiles and Birds. Fisher, Wm. 366.

Jairus (Dental), III, 1882.
Comparative Anatomy of the Teeth. Dennis, S. W. 150-155.

Johnstons' Dental Miscellany, V, 1878.
Dental Anatomy and Physiology. Gaddes, Thomas. 255-266. 1 table.

Johnstons' Dental Miscellany, VIII, 1881.
Extinct Toothed Birds. 70-72. Selected.
Reptiles' Teeth. Tomes. 95.
Specimens of Comparative Anatomy. 350.

Luminary (Dental), IV, 1882-83.
The Tooth of a Mouse. 91. Selected.

Missouri Dental Jnl., XI, 1879.
The Autopsy of an Elephant. Howe, A. I. 267-277. Selected.

Missouri Dental Jnl., XIV, 1882.
The Structure of the Teeth of the Pike. Sternfeld, Alfred. 344-353. Selected.

Monthly Review of Den. Surgery, IV, 1876.
An Abnormal Tusk of an African Elephant. Tomes, Chas. 555.

Monthly Review of Den. Surgery, V, 1876-77.
On the Microscopical Structure of Fossil Teeth From the Northumberland True Coal Measures. (Cont. from Vol. IV.) Barkas, W. J. 7-12.
Introductory Lecture to the First Course of Lectures on Dental Anatomy and Physiology, Human and Comparative. Balkwill, F. H. 214-222.

Monthly Review of Den. Surgery, VII, 1878.
On the Hinged Teeth of the Common Pike. Tomes, Charles S. 119-125. Remarks. 545-546.
On Two New Palaeozoic Hybodont Teeth. Barkas, W. J. 145-148. 4 illus. 189-193. 2 illus.
On the Evolution and Homologies of the Incisors of the Horse. Ryder, John A. 163-165. Selected.

New Jersey State Den. Soc. Trans., 1885.
A Factor in Tooth Preservation. (re Comparative Anatomy.) Pierce, C. N. 123-131. Disc. 131-138.

Odontographic Jnl., I, 1880-81.
Extinct Toothed Birds. Geikie. 75-77. Selected.

Odontographic Jnl., II, 1881-82.
The Cat and Its Relations. Lucas, Frederic A. 33-44.

Odontolog. Soc. Trans., VIII, 2nd Ser., 1876.
Abnormal Tusk of an African Elephant. Tomes, Charles. 184-185. Remarks, 185-189.
Teeth of Poisonous Snakes. Tomes, C. S. 264-266. Remarks, 266-267.

Odontolog. Soc. Trans., IX, 2nd Ser., 1876-77.
Notes Upon the Condition of an Elephant's Molar Which Had Been Injured by a Rifle-Ball. Tomes, Charles S. 89-95. 2 plates.

Odontolog. Soc. Trans., XI, 2nd Ser., 1878-79.
Specimen of Comparative Anatomy. Lessert, Alfred Alex. M. 2-4.
On the Attachment of Teeth. Part III. On Hinged Teeth. Tomes, Charles S. 29-42. 4 illus. Disc. 43-44.

Odontolog. Soc. Trans., XIV, 2nd Ser., 1881-82.
Structure of the Teeth of the Common Pike. Sternfeld. 64-68.

Odontolog. Soc. Trans., XVI, 2nd Ser., 1883-84.
Teeth of Rodents. Bennett, Storer. 256-257.
Observations on the Teeth of Certain Rodents. Betts, E. G. 261-271. 6 illus. 2 tables. Disc. 271-273.
Perfect Tooth of the Mastodon Andium. 277.

Odontolog. Soc. Trans., XVII, 2nd Ser., 1884-85.
Serious Results Which May Happen to Rodents from the Continuous Growth of Their Characteristic Teeth When from any Cause Their Normal Antagonism is Lost. 118a. 2 illus.
Peculiarity of the Socket of the Lower Incisor of a Bandicoot Rat. Wilson, A. 240.

Record (Dental), I, 1881.
Skull of the Bandicoot of India (re the Enormous Development of the Sockets of the Lower Incisors.) Wilson. 277-278.

Record (Dental), II, 1882.
On the Evolution of Antlers in the Ruminants. Dawkins, W. Boyd. 22-24.
The Teeth of the Beaver. 189.
Baboon's Tooth. Hammond, Gurnell, 217.
Dentition in the Horse and Other Animals. Williams. 221-225. Disc. 225-226.
The Structure of the Teeth of the Pike. Sternfeld, Alfred. 351-355, 409-413. Abstract.

Record (Dental), III, 1883.
Classification of the Teeth in Mammalia. Wilson, Andrew, 59-63.
Deer Antlers. Allen, Grant. 361-363. Selected.
Dentition as Indicative of the Age of the Animals of the Farm. Brown, G. T. 495-503. 2 illus. (Cont. in Vol. IV.)

Record (Dental), IV, 1884.
Dentition as Indicative of the Age of the Animals of the Farm. (Cont. from Vol III.) Brown, G. T. 25-30. 5 illus. 124-129. 4 illus. 162-165. 2 illus. 210-217. 7 illus. 262-270. 12 illus. 306-310. 9 illus. 350-358. 12 illus.
The Teeth of Mollusca. Amoore, John S. 110-117.
Comparative Dental Anatomy. Adams, Morgan. 375. Abstract.
The Teeth of the Ox. Wellauer, F. 503-505.

Register (Dental), XXXIII, 1879.
Elephantine Dentals. 262-264. Ed.

Register (Dental), XXXVIII, 1884.
Comparative Dental Anatomy. Adams, Morgan. 328-329.
A Syllabus of Lectures on Odontology. Ford, C. L. 619-621.

Southern Dental Jnl., I, 1882-83.
Dentition in the Horse and Other Animals. Williams. 192-197. Selected.

For index and key to classification numbers, see pink sheets.

D102 Dental Paleontology. Ancient Races of Man.

Teeth of Different recent races. Racial mutilation of teeth.

American Jnl. Den. Sci., XVI, 1882-83.
Answers to Questions on the Teeth of the White, Mixed and Black Races. Morgan, W. H. 321-327. Selected.

Archives of Dentistry, I, 1884.
Prehistoric Teeth. Miller, W. D. 129. Selected.

British Dental Assn. Jnl., V., 1884.
On the Size of the Teeth as a Character of Race. Flower. 510.

British Dental Assn. Jnl., VI, 1885.
The Size of the Teeth as a Character of Race. Flower, W. H. 173-177. 2 tables. Selected.

British Jnl. Dental Science, XXIII, 1880.
The Barnard Davis Collection of Skulls. 106-108. Selected.
Zulu Skulls. 448-449. Selected.

British Jnl. Dental Science, XXIV, 1881.
Fashion in Deformity. Flower. 371-373. Selected.
The Skulls in Hythe Church. Richardson. 1103-1104.

British Jnl. Dental Science, XXVI, 1883.
Teeth of the Amazon Queen. Finlayson. 340.
The Antiquity of Man. 628-629. Selected.

British Jnl. Dental Science, XXVII, 1884.
Anglo-Saxon Teeth. 77-78. Ed.
Mutilations of the Teeth. 217. Selected.
The Dental Apparatus of the Inhabitants of Terra Del Fuego. Galippe. 638-639.

Cosmos (Dental), XX, 1878.
The Teeth of the Mound Builders. Sozinskey, T. S. 496-499.

Cosmos (Dental), XXII, 1880.
Disinterment of Ancient Skulls, Referable to the Tenth Century. 328-329.

Cosmos (Dental), XXVI, 1884.
Diseased Teeth Among the Ancients. Magill, W. E. 384.

Cosmos (Dental), XXVII, 1885.
On the Size of the Teeth as a Character of Race. 40. Ed. 49-52.
Exhibition of Specimens of Prehistoric Dentistry. Waite, W. H. 492-493.

Independent Practitioner (Dental), II, 1881.
Palaeolithic Osteology. Cilley, J. L. 431-433. Corres. Selected.

Independent Practitioner (Dental), IV, 1883.
An Examination of the Condition of the Teeth of Certain Pre-Historic American Races. Barrett, W. C. 513-521. 672-673. Corres.

Independent Practitioner (Dental), V, 1884.
Pre-Historic Teeth. Miller, W. D. 40-43. Corres.
A Survey of Peruvian Skulls. Trueman, Wm. H. 44-45. Corres.

Items of Interest (Dental), VII, 1885.
Change of Teeth with Change of Type (Teeth of Different Races.) Truman, James. 277-280. Selected.

Johnstons' Dental Miscellany, VIII, 1881.
Fashion in Deformity (Racial Characteristics.) Flower. 229-230. Selected.

Luminary, (Dental), V, 1883-84.
The Teeth of Jews. 4. Selected.

Missouri Dental Jnl., VIII, 1876.
Mound Builders. Travis, G. W. 383-385. 2 illus. Remarks, 385. Ed.

Missouri Dental Jnl., XIII, 1881.
Fashion in Deformity (Racial Mutliation.) 232-233. Selected.
The Skulls in Hythe Church. 552.

Monthly Review of Den. Surgery, IV, 1876.
Upon Artificial Disfigurement of the Teeth Among Different Nations. Von Ihering. 439-440. Selected.

Monthly Review of Den. Surgery, VI, 1877.
A Remarkable Deformity of the Teeth Among the Inhabitants of the Admiralty Isles. 109-110. 1 illus. Selected.

Monthly Review of Den. Surgery, VII, 1878.
Dental Curiosities of Ethnology. Hutchinson, S. J. 148-150.
Specimen of a Female Vertebrae. Lessert, A. A. M. 495-496.

New England Jnl. Dentistry, II, 1883.
An Examination Into the Condition of the Teeth of Certain Pre-Historic American Races. Barrett, W. C. 309. Abstract.

New England Jnl. Dentistry, III, 1884.
An Examination of the Teeth of Certain Pre-Historic American Races. 31. Ed.
Collections of Ancient Skulls—From the Tropics to the Far North. Barrett. 321-322. Disc. 322-324, 325-327.

New York Odontological Soc. Trans., 1879.
A Human Artificially-Deformed Skull Found in Hungary. Turnovsky, Eugene. 168-170. Disc. 170-171.

New York State Den. Soc. Trans., 1877.
Teeth of Italians. Horne, William C. 92-94. Corres.

News, (Dental, Knightstown, Ind.), V, 1882-83.
The Teeth of the Yakuts. Aug. 3. Selected.

Odontographic Jnl., I, 1880-81.
Fashion in Deformity. Flower. 88-89. 6 illus. Selected.

Odontographic Jnl., II, 1881-82.
The Human Fosile of Schipka Cave. 81. Selected.

Odontolog. Soc. Trans., XIII, 2nd. Ser., 1880-81.
Filing the Front Teeth. Coleman. 8.

Pennsylvania Jnl. Dental Science, III, 1876.
Upon Artificial Disfigurement of the Teeth Among Different Nations. Von Ihering. 220-221. Selected.

Practitioner (Dental), I, 1883.
An Examination of the Condition of the Teeth of Certain Pre-Historic American Races. Barrett, W. C. 148-152. Selected.

Record (Dental), III, 1883.
An Examination of the Condition of the Teeth of Certain Pre-Historic American Races. Barrett, W. C. 512-513. Abstract.

Record (Dental), IV, 1884.
Pre-Historic Teeth. Miller, W. D. 49-51. Selected.
Report on the Teeth of a Mound-Builder. Betty, E. G. 137-138. Abstract.

British Dental Assn. Jnl., II, 1881.
Mr. Cattlin's Plea for Incompetence. (re Gold Fillings.) 141-143. Corres.
Cohesive versus Soft Gold. 155-156.
Practical Demonstrations in Gold Filling. 514-515. Corres.
The Restoration of Contour, the Only Way to Keep Permanently Separate the Margins of Enamel on Proximate Surfaces, and to Prevent the Recurrence of Decay. (Gold Filling.) Webb, Marshall. 537-538.
Contour Restoration of the Superior Central Incisors. Brown, Parmly. 635-636. Disc. 636-637.

British Dental Assn. Jnl., III, 1882.
The Merits of Soft and Cohesive Gold as Filling Materials. Blount, A. A. 27-28. Abstract. Selected.
Filling With Kearsing's Foil. Browne, Walter. 566. Clinic.
Filling With Kearsing's Foil. Rogers, Claude. 566. Correction, 646. Clinic.

British Dental Assn. Jnl., IV, 1883.
The Causes of the Failure of Gold as a Filling Material. Blount. 510. Disc. 510-512.

British Dental Assn. Jnl., V, 1884.
A New Method of Packing Gold. Herbst, Wm. 243-247. 15 illus. Selected. Abstract.
Gold Filling. Cunningham, George and Elliott, St. George. 446-447. Clinic. Corres.
Gold Filling. Durward. 599. Clinic.
The Herbst Method of Filling Teeth. Bodecker, C. F. W. 679-688.

British Dental Assn. Jnl., VI, 1885.
The Herbst Method of Gold Filling. Bennett, Storer. 28-31. Abstract. 101-102. Disc. 102-106. 107.
Agate Burnishers When Filling Teeth by the Herbst Method. Bennett, Storer. 219. Disc. 219.
Filling With Gold According to the Herbst Method. King, R. F. H. 274. Clinic.
Further Experience With Herbst's Method of Gold Filling by Rotation. Bennett, Storer. 593-596.
Rapid Insertion of Cohesive Gold. Balkwill. 641. Clinic.
Split Teeth Treated and Preserved. (Gold Filling.) Harper, J. C. 680. Selected.
On the Durability of Fillings Made According to the Herbst Method. Forberg, Elof. 736-738. Selected.

British Jnl. Dental Science, XIX, 1876.
Discussion on The Necessity of the Exclusion of Air as Well as Saliva from Large Gold Fillings, and the Best Means of Obtaining these Results. 181-184.
Cleaning and Reducing Gold Filings. Fletcher, Thomas. 369.
Ash's New Circular Gold Pellets and Rock Cement. 559-560.

British Jnl. Dental Science, XX, 1877.
Gold Filling. Read. 81-84.
Plastic versus Gold Fillings. 678-683.
Gold. A Temporary Stopping. Wright, C. M. 720-724.

British Jnl. Dental Science, XXI, 1878.
Gold, A. Temporary Stopping. Wright, C. M. 286-290.
Discussion on The Working of Cohesive Gold. 316-317.
Gold! Gold! Gold! and the New Departure. Hope, W. Hodgskin. 390-391. 530-532.
Gold and the New Departure. Hope, W. Hodgskin. 530-532.
Slayton's Felt Foil and Fileti's Cement. Ribolla, L. 532-533.

British Jnl. Dental Science, XXII, 1879.
Filling Large Crown Cavities in Molar Teeth. Coles, Oakley. 266.
Gold Fillings. Field. 268-271. Abstract. Disc. 271-272.
Gold or Amalgam Fillings. Bensted. C. S. 594. Corres.

British Jnl. Dental Science, XXIV, 1881.
Gold versus Amalgam for Filling Teeth. Musgrave, J. J. 13-15. 15, Ed. 94-95, Corres. 95-96, Ed. 142-143, Corres. Comment, 147-148. 196-197, Corres.
The Secret of Success in Practice. (Gold Filling.) 437-439. Selected.
Gold Filling. Woodhouse. 802. Clinic.
Repair of a Fractured Incisor. (Gold Filling.) 1043-1044. Selected.
Contour Restoration of the Superior Central Incisors. (Gold Filling.) Brown, Parmly. 1053-1054. Disc. 1054-1055.
Restoration of Contour as a Means of Preventing Extension of Decay on Proximal Surfaces. (Gold Filling.) Webb, Marshall H. 1117-1124.
Adhesive and Non-Adhesive Gold Filling. 1151-1152.

British Jnl. Dental Science, XXV, 1882.
Filling Teeth With Cohesive Foil. Betty, E. G. 637-642. Selected.
Gold Foils. 736.
Foil Shears and Folder Combined. 1009.

British Jnl. Dental Science, XXVI, 1883.
Gold Cohesive Cylinders. 275.
Filling by Adhesive and Non-Adhesive Gold. 835-836. Corres.
L'Or Cristallise Adhesif, "Le Marveilleaux." Minot, M. 934-935.
Parisian Crystal Gold. 1177-1178. Ed.

British Jnl. Dental Science, XXVII, 1884.
Herbst's Method of Gold Stopping. Herbst. 116. Selected.
A New Method of Finishing Fillings. (Gold Fillings.) 216. Selected.
Gold Restoration of Abraded Dentures. Brown, E. Parmly. 264-265. Selected.
Gold Filling in Split Tooth. Harper, J. G. 387.
The Advisability of the Insertion of Gold into Teeth by the General Practitioner. 483-484. Corres.
Gold Filling—Is it Justifiable? 582-583. Corres.
Causes of Discoloration in Gold Fillings in Teeth. Hollins, William Herbert. 969-672. Selected.
Working in Gold. Bollensdorff. 1017-1018. Selected.
Herbst's New Method of Filling Teeth. (Gold.) Miller, W. D. 1120-1122. Selected. 1126, Corres.

British Jnl. Dental Science, XXVIII, 1885.
On Herbst's Method of Gold-Filling by Rotating Burnishers. Bennett, Storer. 147-150. 15 illus. 201-208. Disc. 150-153. 212-214.
Agate Burnishers. Bennett, Storer. 429-430. Disc. 430.
Filling Interstitial Cavities in Front Teeth. Herbst. 1144-1145.

Connecticut Valley Den. Soc. Trans., 1877.
Filling Teeth and Preparations of Gold for Filling. Taylor, L. C. 59-64. Disc. 64-65.

Connecticut Valley Dental Soc. Trans., 1879.
Discussion on The Use of Soft Foil. 196-197.

Hydrochlorate of Cocaine. Maxfield, Geo. A. 16-23. Disc. 129-130.
Discussion on The Best Method of Using the Hydrochlorate of Cocaine. 33-36. Selected.
Cocaine Hydro-Chlorate; The New Local Anaesthetic. 37-38. Selected.
Merits of Hydrochlorate of Cocaine in Dental Practice. Hall, R. J. 40-41. Ed. 41. Selected.
Local Anaestetics. 94-95. Ed.
Cocaine. 190-191. Ed.
Aconite as a Local Anaesthetic. 192. Ed.
Hydrochlorate of Cocaine. 230-232. Selected.
Cocaine in Dental Surgery. Marshall, John S. 269-274. 3 tables. Abstract.
Discussion on Cocaine in Dental Surgery. 293-296. Criticism. 377-378. Reply, 430-432. Corres. Answer, 472-478. Reply, 528.
Hydrochlorate of Cocaine in Minor Surgery. Burke, W. C. 322-323. Selected.
Hydrochlorate of Cocaine in Dermatological Practice. Jackson, Geo. Thomas. 323-324. Selected.
Hydrochlorate of Cocaine in Staphyloraphy. Park, Roswell. 331-333. Clinic.
Cocaine as a Local Anesthetic. Allport, Walter W. 373-376. Selected.
Menthol as a Local Anaesthetic. 398. Selected.
A New Local Anaesthetic. 469. Selected.
Menthol as a Local Anaesthetic. 520. Selected.
Substitutes for Cocaine. 522-523. Selected.
Cherry-Laurel Water as a Local Anaesthetic. 571. Selected.

British Dental Assn. Jnl., III, 1882.
A Blaze of Ether. (re Local Anesthetic.) 106-107.

British Dental Assn. Jnl., V, 1884.
Local Anaesthetics in Dental Operations. Dennis, J. Morley. 445-446. Corres.
Cocaine in Dental Surgery. Coles, Oakley. 727. Disc. 727-728.

British Dental Assn. Jnl., VI, 1885.
Cocaine for Relieving the Pain of Extractions. Hutchinson. 108-109.
Citrate of Cocaine Paste. 122. Ed.
Discussion on New Anaesthetic Cocaine. 136-137.
Brief Notes of Cases Treated With the Citrate of Cocaine. Dunn, C. W. 149-150.
Citrate of Cocaine Paste. Bate, Spence. 248. Disc. 248-249.
Citrate of Cocaine. Miller, W. D. 463-465.

British Jnl. Dental Science, XX, 1877.
Calorific Fluid for Annulling Pain During the Extraction of Teeth. Snape, Joseph. 715-716.

British Jnl. Dental Science, XXIII, 1880.
New Dental Preparations. (Local Anaesthetics.) 202-203.

British Jnl. Dental Science, XXV, 1882.
Ethyl Bromide as a Local Anaesthetic. Squire, William. 176.

British Jnl. Dental Science, XXVI, 1883.
Local Anaesthesia. 810. Ed.

British Jnl. Dental Science, XXVII, 1884.
Tincture of Cannabis Indica as a Local Anaesthetic for Use in Dental Surgery. Aaronson, A. 1030. Corres.
A Short Note of the Action of Cocaine in Dental Practice. May, Percy. 1141-1142.
Some Account of the New Local Anaesthetic. Buxton, Dudley W. 1127-1131.

British Jnl. Dental Science, XXVIII, 1885.
Hydrochlorate of Cocaine, The New Local Anaesthetic. Howe, J. Morgan. 37-43. Selected.
Cocaine in Dental Surgery. Coles, Oakley. 94. Disc. 94-95.

A Winter Cold. Bosworth, F. H. 561-566, 593-600.

Johnstons' Dental Miscellany, VI, 1879.
The Tonsils. Moore, W. V. J. 324-326.

Luminary (Dental), II, 1880-81.
Salt for Sore Throat. 39.

Monthly Review of Den. Surgery, IV, 1876.
Peruvian Bark for Sore Throat. Holden. 373.

Monthly Review of Den. Surgery, VII, 1878.
The Tonsils. Moore, W. V. J. 288-290.

616.31 Diseases of Salivary Glands.

Calculi in salivary ducts.

Advertiser (Dental), XII, 1881.
Peculiar Obstruction of Wharton's Duct. Richet. 16. Selected.

American Jnl. Den. Sci., IX, 3rd Ser., 1876.
Radical Cure of Salivary Fistula. 568-570. Selected.

American Jnl. Den. Sci., XI, 3rd Ser., 1877-78.
Chlorate of Potash and Mercurials. (In Cases of Salivation.) Moore, C. V. 143. Selected.
Suppression of the Salivary Secretion. 191. Selected.
Removing Salivary Calculus From Sub-Lingual Gland. 390.
Calculus in the Sublingual Duct. 573. Selected.

American Jnl. Den. Sci., XIV, 3rd Ser., 1880-81.
Treatment of Salivary Fistula. Morris, Henry. 46. Selected.
Cure of a Traumatic Salivary Fistula. Morris, Henry. 94-95. Selected.

American Jnl. Den. Sci., XV, 3rd Ser., 1881-82.
Is Mercury Absorbed By the Skin? (Mercurial Salivation.) Furbinger. 37-38. Selected.

American Jnl. Den. Sci., XVI, 3rd Ser., 1882-83.
Characteristics of Saliva in Syphilities. Harlan, A. W. 8-14. Disc. 14-17. Selected.
Scurvy and Fresh Meat. Neale, W. H. 284-285. Selected.

American Jnl. Den. Sci., XVII, 3rd Ser., 1883-84.
A Singular Case. (Destruction of the Parotid Gland.) Watlinti. 333-334. Corres. Selected.

American Jnl. Den. Sci., XVIII, 3rd Ser., 1884-85.
A Very Large Salivary Calculus Removed From a Patient. Chisholm, Julian J. 187-188. Selected.

Archives of Dentistry, I, 1884.
A Very Large Salivary Calculus Removed From a Patient. Chisholm, Julian J. 257-258. Selected.

Archives of Dentistry, II, 1885.
Treatment of Parotid Fistula by the Injection of Fat or Oil. Molliere. 138-139. Selected.

British Dental Assn. Jnl., I, 1880.
Traumatic Salivary Fistula. 217.
Death From Salivation. 217-218.

British Dental Assn. Jnl., VI, 1885.
A Case of Altered Salivary Secretion. Tomes, Charles S. 465-466.

British Jnl. Dental Science, XXII, 1879.
Medicinal Agents in the Saliva. 673. Selected.

British Jnl. Dental Science, XXIII, 1880.
Singular Obstruction of Wharton's Duct. 854. Selected.

British Jnl. Dental Science, XXIV, 1881.
Belladonna in Salivary Fistula. Allan, James. 45. Selected.

Calculus Imbedded in the Wall of the Pharynx. Stocken. 232-233.
Parotid Abscess Caused by a Fragment of Hay. Meers, Edward E. 375. Selected.
A Case of Salivary Calculus. Parreidt. 788. Selected.
Sanguinary Calculus. Ingersoll, L. C. 986-987. Selected.

British Jnl. Dental Science, XXV, 1882.
Broom-Corn in Steno's Duct Causing Suppuration. 1067-1068. Selected.
On the Presence of Bile in the Saliva. Fenwick, Samuel. 1151-1153. Selected.

British Jnl. Dental Science, XXVI, 1883.
Abscess of the Parotid Gland. Clarke, Andrew. 478. Selected.
Sublingual Tumour and Immense Salivary Calculus Removed by Incision. Mackern, George. 901-903.

British Jnl. Dental Science, XXVII, 1884.
Clinical Lecture on Salivary Calculus and Hypertrophy of Bichat's Boule Graisseuse. Berger, Paul. 6-8.
Wasting Away of the Parotid Gland. Watlinti. 161. Selected.
Salivary Calculus Removed From a Patient. Chisholm, J. J. 1059. Selected.

British Jnl. Dental Science, XXVIII, 1885.
Salivary Calculi. Robere. 82. Selected.
An Unusual Cause of Salivation. 697. Ed.
A Case of Altered Salivary Secretion. Tomes, Charles S. 910-911. Selected.

Calif. S. Den. Assn. Trans., 1882-83-84-85.
Calculus in Wharton's Duct. Davis, C. E. 105-108.

Canada Jnl. Dental Science, IV, 1877-78-79.
Salivation From Pregnancy. 36.

Cosmos (Dental), XVIII, 1876.

XUM

Author Index

To The Dental Periodical Literature Published in the English Language for the Years 1876-1885, inclusive

This author index includes for each individual a memorandum of books, papers, discussions and clinics before dental societies, biographical sketches and other items of value for future reference. The list of names is alphabetically arranged.

It has been necessary that this index be made in accordance with the published record, in which many names are misspelled, or lack initials or first names. Especially in the reports of discussions before societies are there many errors in the names. In the index many are necessarily classified under the last name only and these are in each case placed last in the group of men of a given name. For example: Brown, James A.; Brown, Marcus B.; Brown, William H., may be followed by a list of papers and discussions grouped under the name of Brown, and these latter may belong to any or several of the Browns named above. It will, therefore, be necessary to look, not only for the list appearing under a given name, but also to look for any likely misspellings of the name, and finally under the last name only, to find the complete record for the person.

Discussions are indexed without giving the titles of papers. For each Discussion, the classification or subject number is given for the paper discussed. The subjects to which these numbers refer, may be found in the pink sheets. For example: D07, Archives of Dentistry, I, 1884, 313, refers to a discussion on dental education; D24, Den. Jairus, III, 1882, 194, refers to a discussion on pulp treatment; D43, Independent Practitioner (Dental), V, 1884, 578, refers to a discussion on treatment in orthodontia.

The first and last pages are given for each reference, thus indicating the length of the article. The number of illustrations is also given.

Titles of books are printed in heavy type. A complete list of books, published during the period covered by this index, 1876-1885, will be found on page 1. For each book, references are given to the reviews in the several journals.

A **Classified Index** of all articles will be found preceding the pink sheets.
